In both modern and classic spaces, Clam™ Portable's refined sense of style effortlessly enhances indoor or outdoor settings with soft light and design appeal. Clam™ Portable can be brought outside but must be stored indoors.

FROM NATURE WITH LOVE

Material choice and the possibility of repair are essential to ensuring longevity. Each piece in the outdoor collection is made with honest, durable materials that age beautifully. Responsible materials like certified wood and certified textiles are preferred and used in most pieces.

TEAK

For the Love of Wood

We use teak for most of our outdoor furniture, as it requires little care and maintenance. All of the teak in our outdoor furniture is FSC™-certified. The high content of natural oils makes the teak highly weather and rot resistant and is, therefore, an excellent choice for outdoor furniture. We only use core teak because it is richer in natural oils making it evenly grained, more weather resistant and longer lasting than the outer teak wood.

Teak is a heavy, hard and sturdy wood type but also an organic material. Teak wood will naturally expand and contract with changes in temperature and humidity and small cracks or scratches can occur at temperature or weather changes. Remember to re-tighten the fittings from time to time.

FSC™ FSC-C120451

From left to right:
New (untreated), 1 year (untreated), 2 years (untreated), Oiled

Brand new teak furniture has natural colour differences found in the freshly cut wood. Once the furniture has been exposed to the sun, these colour differences will even out. As a natural part of the aging process, the surface of teak will change when first exposed to rain; this is the primary stage of a process of wood that ages beautifully over time.

The easiest way to maintain teak is to leave it untreated. This does not affect the durability or quality of the furniture. Untreated teak will develop a patina over time and eventually become a beautiful silvery-grey colour.

It is important to prolong the furniture's lifespan by cleaning it at least once a year. This will remove algae and dirt and make the furniture more resistant in all weathers, all year round. To preserve or intensify the original honey-golden colour of fresh teak, use a suitable furniture oil on a regular basis.

TEXTILES

For the Love of Design

Fritz Hansen’s outdoor collection contains a range of high-quality outdoor textiles with suitable properties for outdoor use. All of our outdoor cushions and pillows are made to last – just like the furniture they are designed to accompany, adding comfort to the outdoor space.

Our range of textiles for cushions, pillows and umbrellas are designed to withstand every kind of weather. The textiles are extremely colour and lightfast, water and dirt-repellent and even mildew-resistant. The result is a smooth surfaces textile, pleasing to the touch.
