SQUID

Design RadiceOrlandini DesignStudio

S•CAB

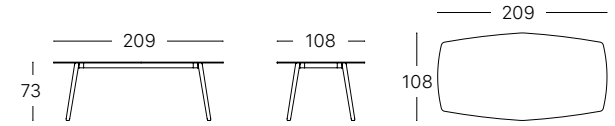

Squid nasce dalla necessità di creare un tavolo versatile a seconda del top, adattabile ad ambienti diversi, e quindi declinabile in svariate forme e dimensioni; un tavolo in grado di accogliere piani in hpl ma anche in marmo, fisso ma anche allungabile. Il fulcro del progetto è la gamba in pressofusione di alluminio, che unita a telai metallici di forme e dimensioni diverse, dà vita ad una collezione di tavoli ampia e diversificata.

Squid comes from the need to create a versatile table according to the top, adaptable to different environments, and therefore available in various shapes and sizes; a table that can feature tops made of HPL but also of marble, fixed but also extendable. The fulcrum of the project is the die-cast aluminium leg, which, combined with metal frames of different shapes and sizes, gives life to a large and diversified collection of tables.

Squid naît du besoin de créer une table qui s'adapte partout en fonction du plateau, et donc déclinable dans plusieurs formes et dimensions ; une table capable d'accueillir des plateaux en hpl mais aussi en marbre, fixe mais aussi à rallonge. Le cœur du projet repose sur l'enjambement en aluminium coulé sous pression, qui associé à des structures métalliques de formes et dimensions différentes, donne vie à une collection large et diversifiée de tables.
