narbutas

From one computer desk to Europe‘s fastest-growing furniture company

Our story began in 1991. We set out on a mission to make quality and modern workspaces available to more people.

From a single product – a desk for a computer in 1991, our range grew to offer everything you need to furnish a modern office.

We produce diverse products from desks and chairs to acoustic furniture rich in technological solutions.

All of this is done in Lithuania, home to one of the largest office furniture factories in Eastern and Central Europe.

Apart from the constantly expanding production capabilities and technologies, over time our company has developed strong in-house innovation, custom-made furniture, IT, logistics, customer support departments.

All of this allows us to ensure the quality of every single step in product development.

Delivering what matters

“I also found out that, just like me, our customers like functional and good quality products and are not willing to pay for what they do not need. That is why we design and manufacture functional, high-quality, attractive yet simple things. Our design motto is: Nothing unnecessary.

Petras Narbutas,
company founder and owner

Concept & Design

In-house design team

Our award-winning in-house design team comprises professionals with almost 30 years of experience in furniture production and design.

Working with international designers

NARBUTAS experienced product development team and innovation group work closely together to find optimal, high-quality solutions. Additionally, we collaborate with internationally known designers from Lithuania, Italy, Denmark, Germany, Spain, USA, Japan, etc. Longterm work with international partners brings great results.

Find more about our work with designers on pages 9-17.

Globally relevant

By combining Italian design, subtle Scandinavian minimalism, and natural Lithuanian coziness, we deliver design that will outlast short-lived regional fads and will be easy to integrate, expand, or combine with existing furniture and interior solutions.

Nothing unnecessary

It matters to us that our furniture is functional, high-quality, and attractively designed, and at the same time, we make sure that our customers do not have to pay for what they do not need.

Manufacturing

The continuous modernization and automation of NARBUTAS furniture factory in Lithuania ensure a reliable production process and the highest quality of furniture produced, both standard and custom-made.

Using advanced technology

We make substantial investments in machinery and automate processes for our people to be able to focus on what really matters. Our main goal is to reduce the workload for our employees and to increase our production volume.

Integrating lean production

We follow the lean method to be able to hedge against the risk of error even during the rapid growth of volumes. We are growing at an incredible speed: around 40% a year. The lean method has allowed us to be flexible and to eliminate all possible errors in advance. Even with this growth, we are continuing to manufacture within the 2-week window that has always been our standard.

Assuring quality

Our quality control is executed in multiple stages to assure there are no errors in the final result. First, we check the quality of materials received from our suppliers, secondly, the components produced, finally, one more inspection of the completed components is conducted before the packaging process. While all these processes take a long time, they enable us to ensure that only high-quality products are delivered to our customers.

Set-up & Consulting

We offer various solutions aimed at making the whole process, from choosing your furniture to setting it up as quick and simple as possible.

Extensive customer support

Highly qualified NARBUTAS customer support team speaks seven languages (Lithuanian, English, French, German, Russian, Italian, Polish, Spanish). Dedicated key account managers assure timely response and work with tight client feedback loops.

Tailored visualizations

Our team will help you make the most of your office space by suggesting a layout for your office and the furniture according to your expressed needs. We make it easier for you to imagine products in your space by creating tailored 3D visualizations.

Online ordering system and additional services

NARBUTAS online price list contains extensive information regarding our product ranges and services including catalogues, product presentations, technical sheets, operation manuals, and pictures. All of our assembling schemes are made available on our website or can be found by scanning the QR code on the box of the product. This way we make it easier for clients to plan the assembling process and time in advance. We provide videos explaining the more difficult parts of assembling. For your convenience also provide full support in logistical arrangements.

Custom-made solutions

There is no office culture that works in the same way, there is no team that has the same needs. This is why we specialize in custom-made office furniture that attends to individual needs.

Flexibility & professionalism

Experienced team of professionals can adapt the size or materials of our current standard products to suit your office requirements or create new ones. Engineers of Non-standard Furniture Department will consider every last detail to suggest the best solution and bring your vision to life. All ideas turn into functional and ergonomic office furniture.

Technical capacity

Our state-of-the-art equipment is highly universal and allowing us to manufacture both large and small individual orders. It makes us very flexible when it comes to customer requests and the capability of realizing even the most complex projects. We have mastered the use of diverse materials, creating furniture with bentwood or metal elements of varying complexity, as well as upholstered and acoustic furniture.

Find more about the custom-made solutions we offer our customers on pages 484-495.

Christina Strand and Niels Hvass

We met the NARBUTAS team and felt that the company's strategy fitted into our way of working. We developed a good relationship and met great enthusiastic people who want to move the company forward.

Strand + Hvass have many years of experience in the world of design. Over the years, their style has developed to become modern and innovative, yet based on classic values and a timeless aesthetic. They have a bold vision of the value and impact of design on today's world and create unique products to match.

Baldanzi & Novelli Designers

The extraordinary thing I have discovered in Lithuania is the desire to create things. While working together hand in hand our two cultures mix and complement each other resulting in a third element – an energy that cannot be found elsewhere.

Collaboration of Baldanzi & Novelli designers and NARBUTAS began in 2013 with mutual interest. NARBUTAS were interested in Baldanzi & Novelli's more than 30 years of experience, great design culture, originality, and familiarity with cutting-edge technology, while the designers were attracted to the company's clear-cut vision and recognizable style.

Orlandini Design

“I don’t think we need new objects unless they have something new to say. When I design a new piece of furniture, such as a chair or a desk, it has to add something different to my life. A new charming shape, a new way of working, a new technical solution, a new material.

Folco Orlandini was born in 1972 in the Italian city of Grosseto. He studied architecture at the Polytechnic University of Milan before gaining work experience in various design studios. Since 2009, together with his father Paolo, he has been running the legendary Orlandini Design studio founded by his father in the 1960s.

Roberto Lucci

“Creativity alone is not design and problem solving without creativity is not design either.

Roberto Lucci has been designing for over half a century, always driven by the notion that design is creative problem-solving.

Alegre Design

We believe that the future of design lies in combining creativity and precision. With NARBUTAS, we fuse aesthetics and cutting-edge technology to configure workspaces that are as functional as they are inspiring.

The creative philosophy of the studio Alegre Design is to inspire change through innovations and design, think and create not only what is expected today but also anticipate what people will need in the nearest future. This studio understands design as a global concept that encompasses more than just style, it has the potential to create realistic solutions for the product's lifespan: from the production process itself, the sustainability of its manufacturing, the use efficiency, the user interface or its environmentally-friendly materials.

Annie Lee

We often forget that design is a powerful language — it needs clear communication. Design is a special moment, whether for an individual or a big brand, to convey their message from the inside out. And what is on the inside always matters.

Annie Lee was born and raised in South Korea before moving to the U.S. to study and work in fashion. A shift in fate found her a successful career blazing a trail through New York City's interior design industry for 20+ years. Today, Annie is the design leader of ENV and former IIDA NY President.

Q-ACTIVE

Ergonomic workplace in just 9 minutes

A workplace with a sit-stand desk is versatile and easily adapts to different working styles and changing tasks. Thus, we invite you to discover Q-ACTIVE. It is a modern sit-stand desk that makes it quick and easy to set up an ergonomic workplace.

* - only 800
** - left/right

Optimised smart packaging

The Q-ACTIVE sit-stand desk is delivered pre-assembled, with the entire frame in one package and your chosen desktop in the other. The smart packaging design ensures smoother and faster product assembly.

9 min

Very quick assembly – an advantage for large projects

The structure of the Q-ACTIVE desk was developed in such a way that the desk can be assembled as quickly as possible, allowing you to set up your office workplaces in the shortest possible time. The whole Q-ACTIVE desk can be assembled in just 9 minutes.

Wide range of applications for different spaces

With a range of desktop sizes and colours, as well as a telescopic frame that fits all desktops, you can create desks of your desired design that are easily adaptable to different office spaces.

Achieve your level of comfort

The height of the desk can be adjusted with the button of your choice – with a screen or up/down version. You can choose the most comfortable desk height for you and save your two preferred positions.

The sensor in the desk legs reacts to obstacles by automatically stopping the desktop. The anti-collision feature reduces the likelihood of damage should the desk collide with a hard object.

SIT-STAND DESKS

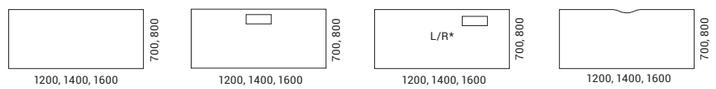

Q-ACTIVE

B-ACTIVE

Enjoy more freedom, physical activity and productivity!

B-ACTIVE is a practical electric height-adjustable desk that stands for ergonomics and quality, which is now even more accessible to customers.

* - left/right

Every detail matters

You can choose from two different types of metal legs. Create your own custom B-ACTIVE desk by choosing desired components from the desktop right down to the feet.

Safety and stability

For greater safety at the workplace, B-ACTIVE has an integrated anti-collision feature and a feature protecting the desk against overloading.

SIT-STAND
DESKS

B-ACTIVE

ACTIVE

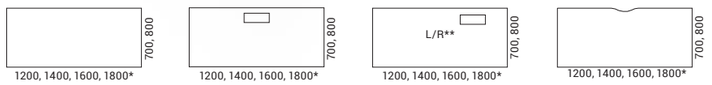

An easy way to stay active at work!

ACTIVE desking system can be best described in two words: functionality and quality.

MAX
1200 / 1300 mm

MIN
650 / 725 mm

* - only 800
** - left/right

Easy to customize

The desk height can be adjusted by pressing a selected button: a memory position button with a display, or up and down controls.

Feet design

Choose from three types of metal feet. All the designs look minimalist, light and with different elegant accents.

Anti-collision feature

Both the 2- level and 3-level feet sensor will automatically stop the desk's movement if it senses an obstacle in its path. The anti-collision feature reduces the likelihood of damage should the desk collide with a hard object.

MOTION

> 452
EXECUTIVE
FURNITURE

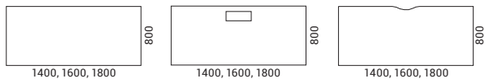

Makes you move forward!

The system is available as single desks or bench desks designed for a flexible arrangement of workstations as well as for individual or group work.

MAX
1200 / 1300 mm

MIN
650 / 700 mm

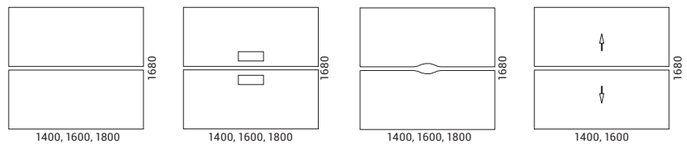

Leg design

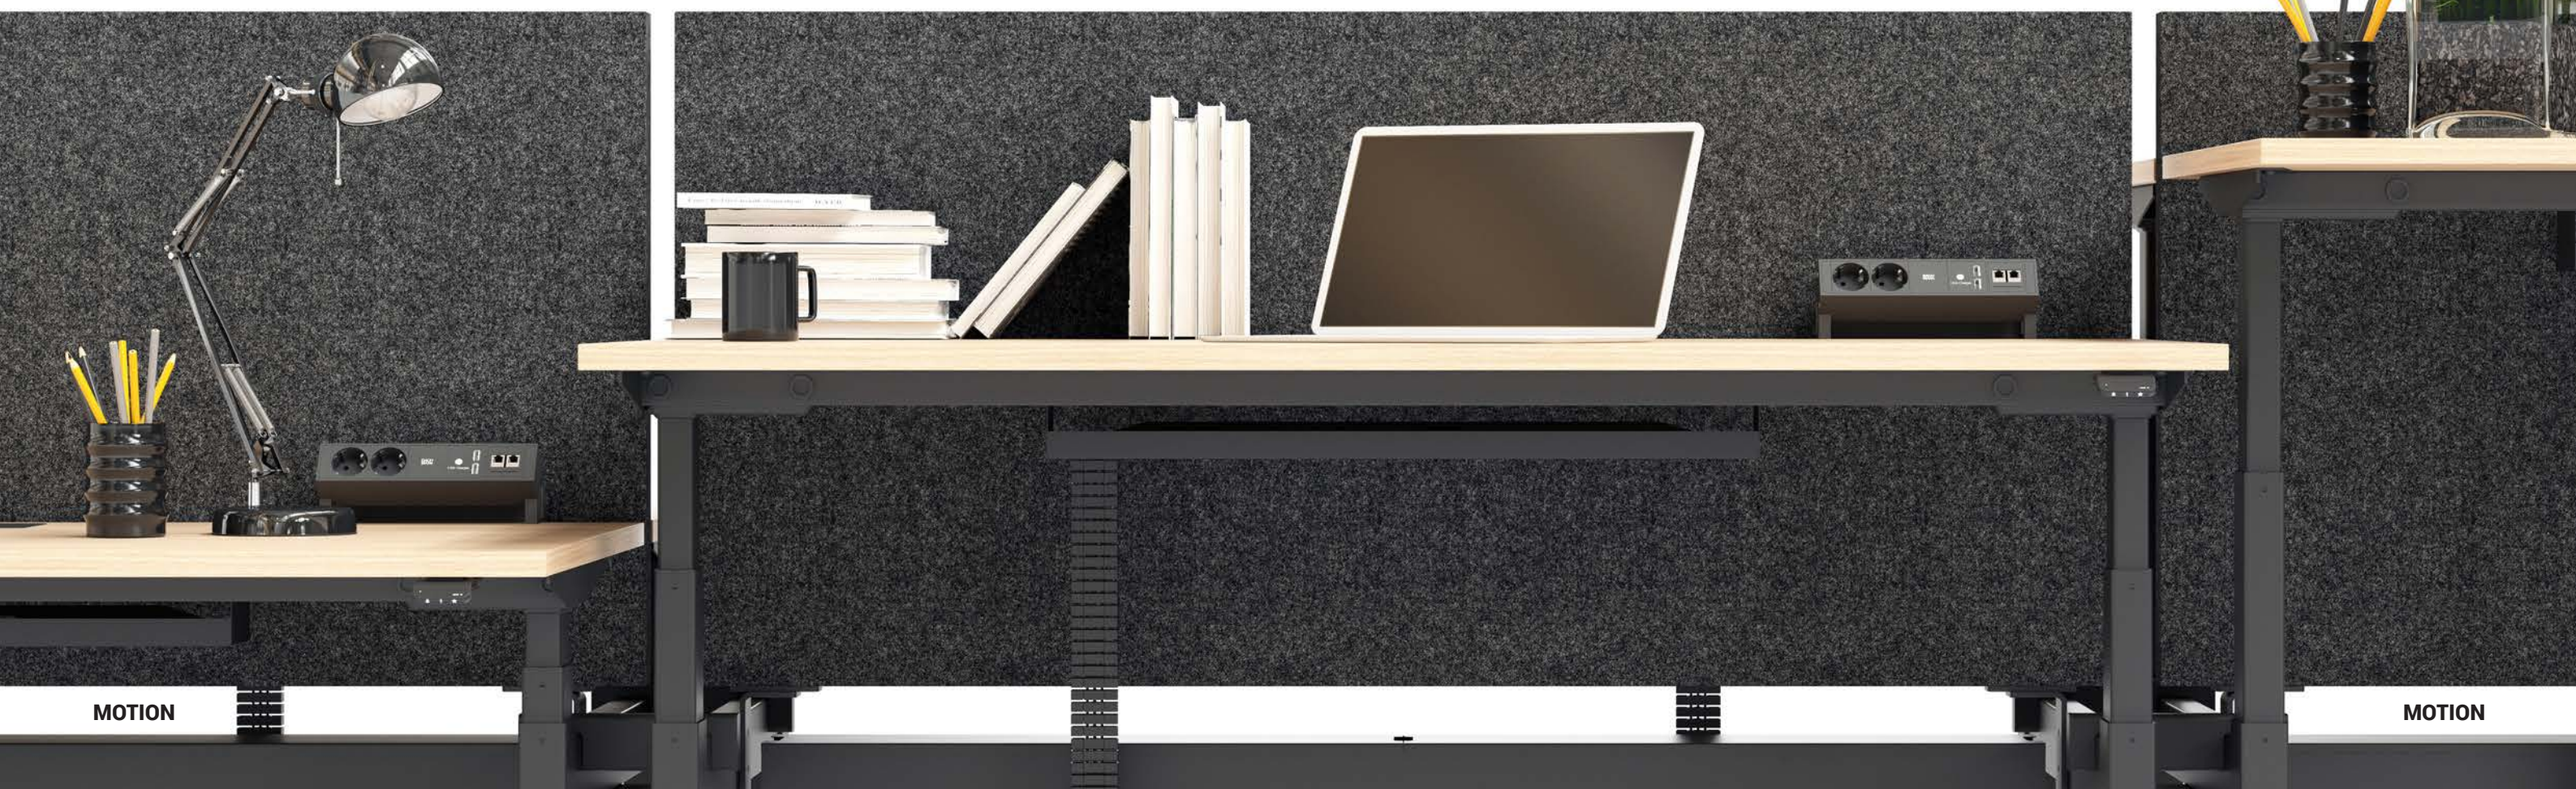

MOTION desks offer a choice of two different leg designs. H-shaped metal legs provide a more generous space for movement and storage. Those who desire more privacy can choose a desk with panel legs which visually cover up the space under the desk and add an aesthetic look to it.

Acoustics and concentration

A fixed-height acoustic desk screen MODUS designed for bench desks will ensure acoustic comfort and help your employees maintain concentration. Furthermore, the double-sided acoustic desk screens allow you to create colourful combinations.

SYNERGY

TABLES

Workplace that inspires

A work environment with an original character makes employees more engaged and helps them to build and maintain a closer relationship with a company. ZEDO is an inspiring and flexible desk system featuring distinctive design with carefully selected and colourful accessories that will help you create workplaces with a unique character.

GERMAN DESIGN AWARD SPECIAL 2023

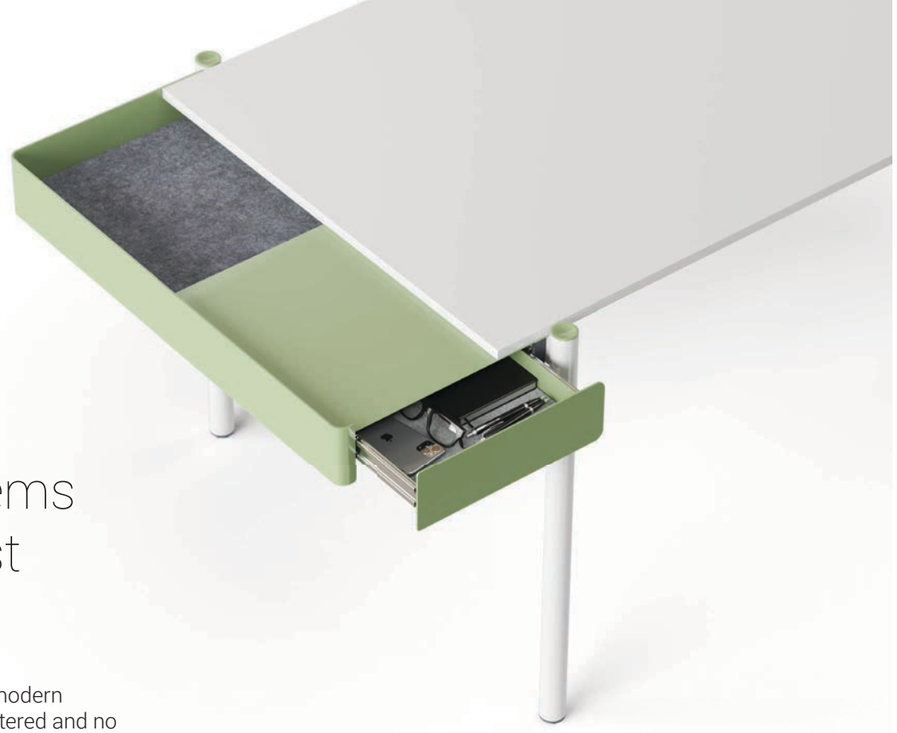

* - desktop depth
** - only 785 (700)

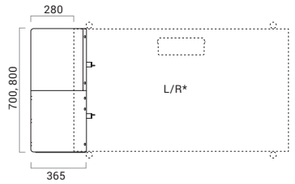

Original design and unique combinations

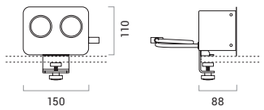

The main element of the ZEDO design is a round metal leg on the outer part of the table, with a playful coloured plug as the final touch. The original design of the desks offers a very wide range of options for combining the colours of legs, plugs and accessories to create a unique workplace atmosphere.

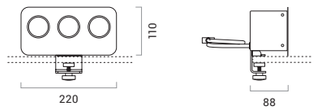

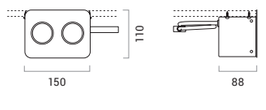

For storing items in a minimalist workplace

Thanks to digital technology, a modern workplace is becoming less cluttered and no longer requires many cabinets. Minimalist drawers and open niches with a PET felt lining are perfect for such a case.

Design continuation in convenient power solutions

Exceptional power units blend in the whole design concept perfectly due to the choice of metal colour and rounded forms. The power unit can be mounted on or under the desk for convenient and quick access to electricity.

* - left/right

Thought out to the smallest detail

A wide range of pedestals and storage towers allow you to store your personal items conveniently as well as hide cables. The holes in the frames allow you to easily combine several workplaces into a single power circuit, while the elegant metal box with opening grommet provides easy access to the sockets.

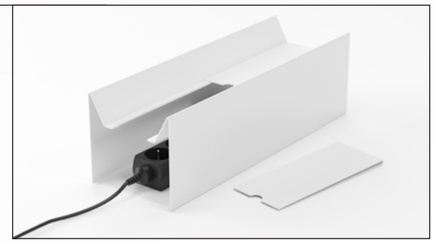

Cable-hiding desk screen construction

Pedestals for convenient item storage

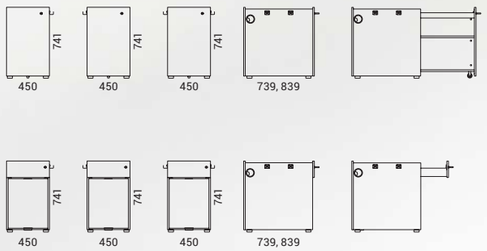

Cut-out for wire management

Metal box for power unit and cable management

A niche for storing items

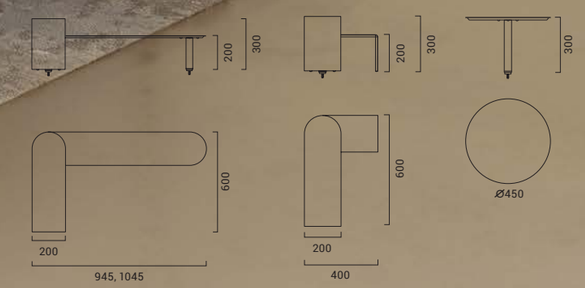

Colourful shelves – stylish and practical

Bicoloured metal shelves create a distinctive and stylish look. Shelves of varying forms can be combined with each other and into higher compositions. That way you will also clear your desk of small items and be able to clean it easily as well as disinfect.

TABLES

Designed for every work scenario

A system of tables designed for all types of meetings, team or individual work and provides mobility. These tables were created with the aim of meeting the need for flexible office furniture suitable for various situations. The collection consists of tables in three heights and two tabletop depths.

reddot winner 2025

GERMAN DESIGN AWARD WINNER 2025

Light industrial design

The design of the table blends the usual features of a strict industrial design with a soft contemporary aesthetic. It combines the usual characteristics of strict industrial design with soft contemporary aesthetics. This style embraces the raw beauty of industrial materials, such as metal, while prioritising practicality and wide applicability.

Create the look you want

The selected planter boxes will add style to your office space, creating a trendy biophilic interior. The perforated metal top and the decorations hanging from it will bring more coziness and individuality to the workspaces.

A table that grows with the team

As the team expands, the demand for new employee spaces increases. For this, the tables with 1000 mm deep tabletops can be extended using supplementary units.

For effective collaboration

A monitor attached to the table legs will ensure that meetings run smoothly and engage all participants. Opting for a whiteboard will provide a convenient way to manage key information.

CONFERENCE
& MEETING
TABLES

Collaboration will be facilitated by convenient shelves attached to the table legs, providing storage for essentials needed for meetings and individual tasks. The attachable hook is ideal for hanging your bag.

PARTHOS

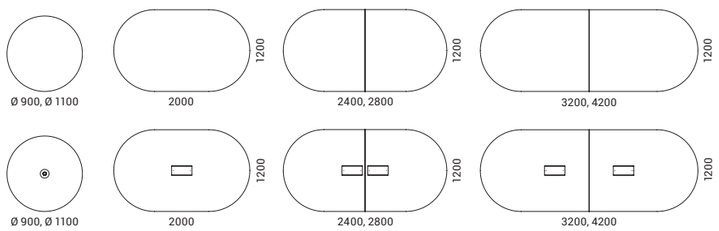

> 132
HIGH
TABLES

OCCASIONAL
TABLES

Architectural design

The main design element of the table is a sculptural cylindrical column resembling classical architecture. It is the unifying and distinctive design element of the PARTHOS table collection. Round tables are ideal for effective collaboration, because we can see and hear each other well and actively share ideas and information.

Thoughtful functional solutions

You will not see any protruding cables on the PARTHOS tables, as they are hidden under the tabletop in a PET felt cable tray and column. For two and three column meeting tables, you can also choose a rectangular metal table grommet for wire management.

Developed according to the sustainability principles

The tables are made from recyclable materials using energy from renewable sources. The furniture is durable and its design is well thought out. The tables that are no longer in use can be easily disassembled and their parts can then be recycled.

Design with elegant shapes

The cylindrical column is covered with PET felt, whose textural pattern of vertical lines further emphasises the allusion to the element of classical architecture.

ARQUS

Designer Orlandini Design

Modern luxury with character

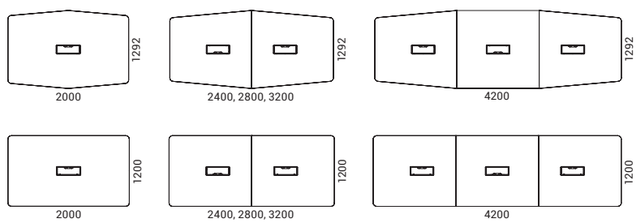

Executive furniture collection with a modern luxury feel. Every piece of this furniture emphasises a flawless image and distinctive character.

GERMAN DESIGN AWARD WINNER 2024

Unique shapes of meeting tables

Meeting tables are available with two types of tabletops – rectangular and boat-shaped. The latter shape facilitates communication and collaboration among meeting participants, allows everyone seated around the table to have clear sightlines and encourages eye contact.

Modern luxury design

The sturdy structure of metal table legs is a distinctive design element that adds the piece of furniture a sense of lightness as well as longevity and durability.
The collection is made from the highest quality materials. They symbolise luxury and refinement.

Fully complete presentable image

By using the entire ARQUS collection for the interior, you can set up an exceptionally modern and presentable executive workspace that not only has an elegant style but also creates a very comfortable working environment.

A cosy multipurpose island for efficient meetings

The multipurpose meeting table can serve as a cosy island for convenient team meetings in an open-plan office. Thanks to the three different height options of the tabletop and the well-designed accessories, the multipurpose NOVA Wood table will enable you to create a more private, practical space for both long meetings or spontaneous stand-up meetings for coming up with quick solutions or generating ideas.

* Tabletops are also available with cut out for power socket.

PLANA

Design by Roberto Lucci & Paolo Pampanoni

Exclusive meeting tables

The Italian design of the tables is based on the harmony of straight and curved lines.

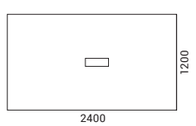

Quality is in the details

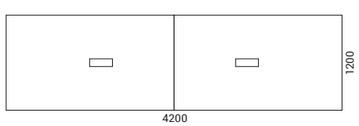

The rectangular tables come with soft closing grommet, beautifully framed in metal and concealing the box for wire management. This functional detail becomes invaluable in long meetings.

The elegant three-part curved steel legs are crafted using difficult technology and are the ultimate distinctive feature of the system. The solid thick tabletop increases the sturdiness and the visual impact of the tables.

WORKLAB

Design by Baldanzi & Novelli designers

The idea arose from the need to have a dynamic workspace and to break free from orderly office schemes. It has been designed to fit in all those spaces that need to be modified on demand.

Baldanzi & Novelli designers

Make your workspace more dynamic

WORKLAB is a multifunctional piece of furniture that allows you to comfortably use a conference wall, whiteboard, temporary workplace, shelves or make a private space where it is needed the most. Combining all these functions creates a modern and dynamic environment where there is a flow between individual work and team work.

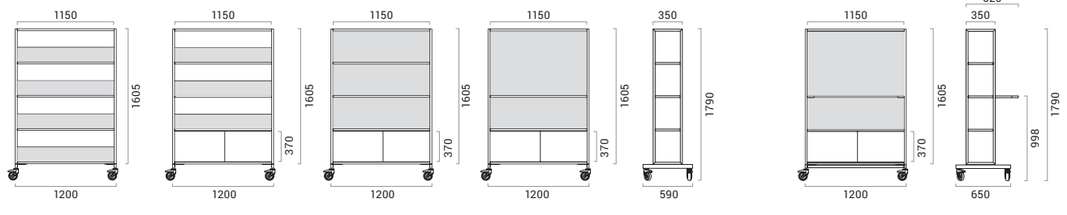

Distinctive design and ensured mobility

This multifunctional piece of furniture was designed by the Italian design studio Baldanzi & Novelli designers. The construction of WORKLAB is based on a metal frame that is robust, durable and easy to clean. Its shape is simple, but also stands out in a traditional work environment. Large castors are an integral part of the WORKLAB design, ensuring the mobility of this piece of furniture and enhancing its unique image.

Power solutions

The cable tray and well-thought-out placement of the power socket and power cord outlet ensure that convenient access to electricity is maintained when changing the WORKLAB's location.

For user convenience and cosiness

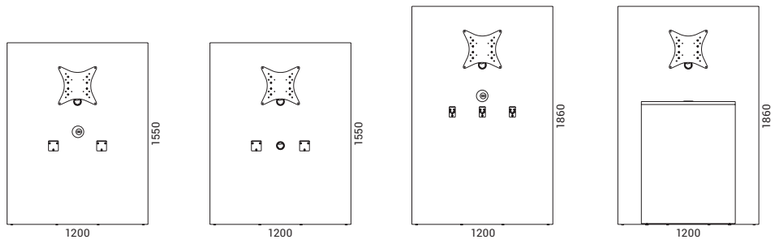

Once you have customised the model that is right for you, you can also order a hook, shelf or side panels for additional functionality. Using these accessories, you will be able to conveniently store things or create more private spaces. They will also become playful design elements in the interior.

MEDIA

A smart solution for meeting areas

It gives you an easy way to show presentations and to participate in video conferences and meetings. The conference wall can be attached to various types of meeting tables or high tables. You can also choose MEDIA wall with a power socket and with a cable port for wire management.

Light industrial design

The design of the table blends the typical characteristics of strict industrial design with a gentle contemporary aesthetic. The bent metal legs, rounded corners of the table tops, and chamfered edges reflect subtle rounded shapes. The curved metal table legs lend the furniture a sense of elegance.

Variety of functional solutions

A monitor hung on the table's metal legs allows you to integrate technology into your meeting spaces, while a whiteboard will help you ensure that every idea is recorded.

Side shelves hung on the table's legs are ideally suited for storing small items needed for meetings or daily tasks, while an attachable hook is perfect for hanging your bag.

For a stylish workplace

You can complete the look of your table by incorporating planter boxes, where the plants bring a cozy and inviting atmosphere to the room. You can also choose a perforated metal top cover. It can be used to decorate the workplace with garlands of light bulbs or plants for added style.

HIGH
TABLES

Irreplaceable in dynamic environments

The multifunctional tables with 1000 mm deep tabletops can be fitted not only with supports but also with castors. This makes it easy to move these tables to different areas of the office.

COMBUS

More than just a shelf

COMBUS is a modular shelving system that not only serves the function of a traditional shelf, but is also a good solution for shaping and dividing spaces. It consists of different types of shelving, which are designed to be placed in an open space, against a wall or on top of cabinets. The COMBUS collection has all the key features required to become an essential part of the modern office, where different types of spaces are intertwined – it is functional, has an easily adaptable design and is environmentally friendly.

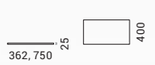

Different options for different needs

The COMBUS shelving system consists of freestanding shelving units, planter shelf units, shelving units for mounting on cabinets. This shelving system can be used in the middle of a space, against a wall or shaped as a corner.

Wonderful simplicity

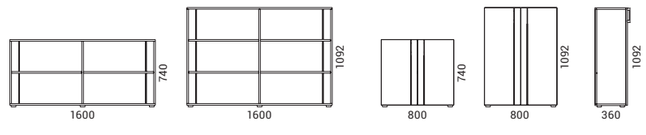

Simple and ergonomic solutions are ideal for setting up large office spaces and help to create a coherent interior style.

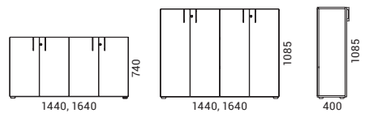

Adapted to desk height and depth

The height and depth of the cabinets match the bench desks available in the product line.

Decorative elements

Choose decorative Plexiglas inserts and handles for your cabinet to add a nice touch to it.

NOVA

CABINETS &
SHELVING

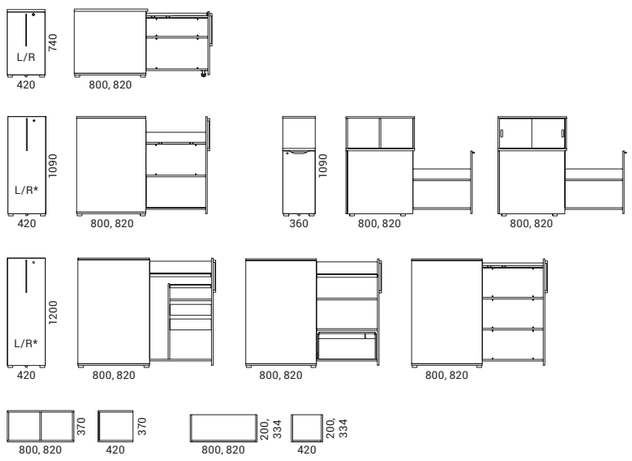

BOXI

Minimalist style – unlimited possibilities

BOXI storage tower is a simple and universal solution designed to accommodate all office essentials for the daily needs in the office.

* - left/right

Flexible arrangement of work spaces

Choose a preferred tower height: a 740 mm storage tower can serve as an extension to a fixed-height desk, whereas 1090 mm or 1200 mm options will be a great addition to the sit-stand desks or can be used as a workspace divider. BOXI storage towers with shelves can have either right-hand or left-hand configuration thus they can be easily re-arranged if you decide to change the workspace layout.

All storage towers are available in two depths of 800 mm or 820 mm, thus they can be combined with single desks or bench desks.

Make the most of all available options

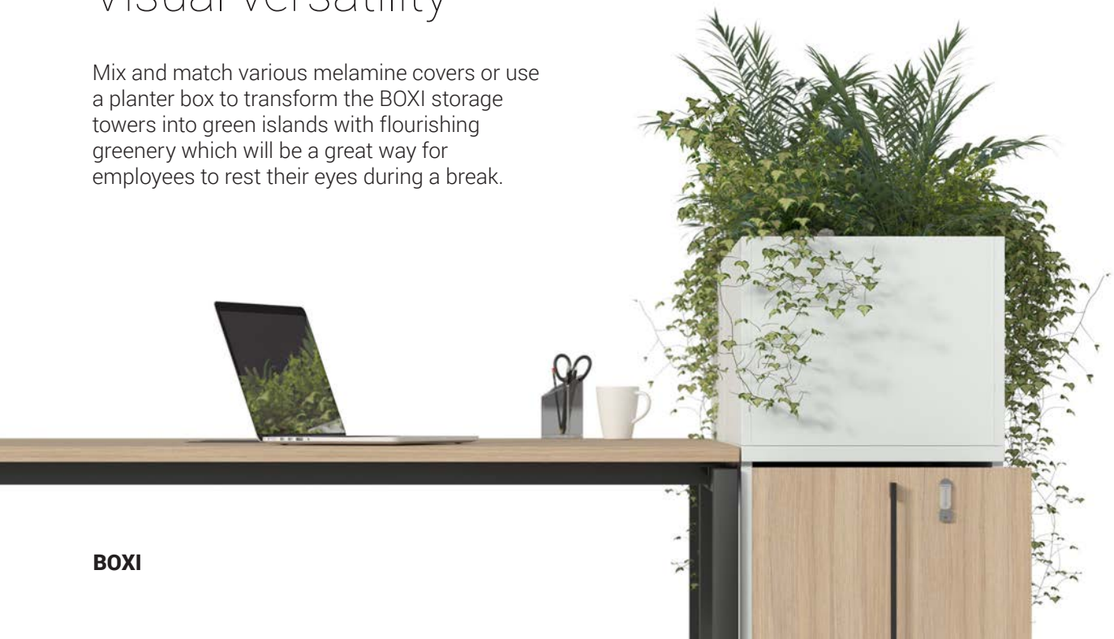

Choose spacious shelves or universal file drawers, small shelves with an upholstery lining or small drawers for storing small items. BOXI storage towers with USB or plug sockets will allow you to charge your mobile devices.

Visual versatility

Mix and match various melamine covers or use a planter box to transform the BOXI storage towers into green islands with flourishing greenery which will be a great way for employees to rest their eyes during a break.

Unlock your personal space

Modular lockers are a versatile solution for the secure storage of personal and office items, whether for temporary or all-day use. The CHOICE lockers are ideal for both mobile employees and those with a permanent workplace or office visitors.

Easily customisable modular system

Segments of lockers in different sizes and types will meet various needs, such as storage of both small and larger personal items and office supplies. Combine modules of the same height to create the combination you want. Choose from two available door heights and types – standard or with cut-outs for mail or air circulation.

Fulfilling individual needs

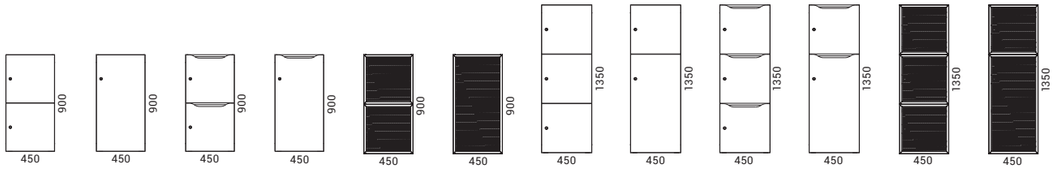

The CHOICE collection offers a wide array of cabinet types, from lockers of three different heights to cabinets with niches for hanging clothes or a short rest break. To complete your locker combination, you can choose planter boxes which are available in two different sizes. You can also choose the minimalist option with a top panel that will give lockers a harmonious look. Metal shelves, a name card holder, or a hook for clothes help create the most practical locker for each user.

Four types of locks

In addition to traditional key-operated locks, we also offer combination locks and electronic locks. Lockers with electronic locks can be intended for personal use or temporary storage by several users.

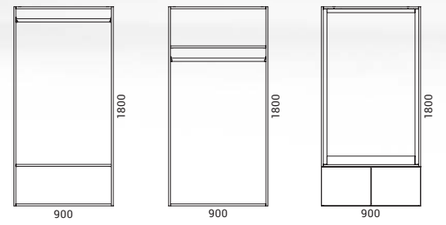

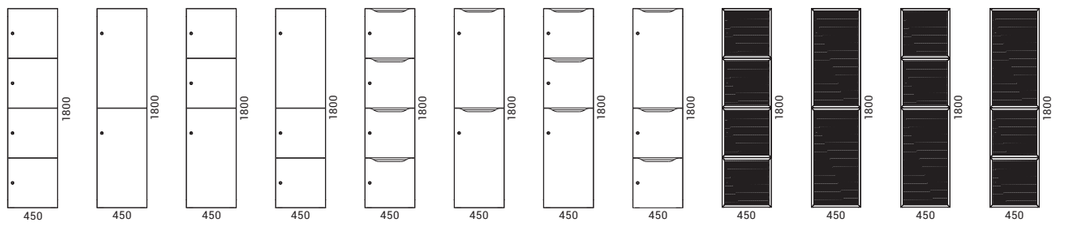

Everything you need to create your chosen image

Lockers are a great way to convey your company's image. Use different finishes (melamine, HPL, veneer or even perforated metal) and a wide range of colours to create your chosen image. These lockers can be customised in your company's corporate colours.

SONUS S

Sleek design, ultimate focus

The SONUS S acoustic pods offer excellent sound insulation, creating a pleasantly quiet environment. According to ISO 23351-1:2020, the acoustic pod is classified as sound insulation class B. With the SONUS S door closed, you are shielded from disruptive office noises, and your private conversations remain confidential.

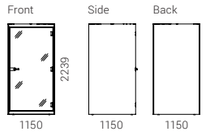

Acoustic pod with PET felt back wall

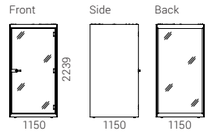

Acoustic pod with glass back wall

Two types for different situations

Opt for a configuration with a glass back wall for increased transparency. A glass insert in the back wall not only allows more light into the pod but also preserves visibility into the space behind it, making it an ideal choice for placement in open-plan offices, adjacent to glass partitions, or even next to windows. An acoustic pod with a PET felt back wall is suitable for placement against a wall.

Acoustic pod on castors for enhanced flexibility

If you have a SONUS S model without castors, you can always order them as an option. An acoustic pod on castors offers a highly convenient solution, providing flexibility. These types of acoustic pods not only can be placed side by side but also relocated to different locations as needed, adapting to changes in office layout or requirements. This does not require disassembling the SONUS S.

Effective lighting reduces eye strain and ensures a presentable appearance on camera.

The quiet and efficient ventilation system ensures your comfort, even during extended periods of work.

System control – adjust your acoustic pod to your needs.

A power socket with AC and USB fast charger type-A and type-C connectors ensures that you can charge your devices at any time.

What features of SONUS S create an ergonomic environment?

The SONUS S is designed to provide employees with a work environment that is not only comfortable and aesthetically pleasing but also ergonomic. The pod is spacious, allowing you to feel free and unconfined. Use your laptop with ease and place your essentials conveniently on the desktop. Underneath, you will find an intuitively accessible built-in power socket that doesn't occupy space in your work area.

SILENT ROOM

Less noise, less chaos

Multilayered SILENT ROOM wall structure, hermetic door and ceiling ensure sound insolation. The inner layer of the panels is made from high-class acoustic material that eliminates echo and has excellent sound absorption properties. The upholstered exteriors block out noise effectively and create an acoustically-optimized working environment.

Creative freedom to customise your design

SILENT ROOM offers a variety of design options for you to be able to create a personalised design and desired office mood. The interior and exterior finish can be selected separately. Both melamine and upholstery can be used for the exterior panels.

A powerful ventilation system installed at the floor level and in the ceiling of the SILENT ROOM acoustic pod efficiently removes excess heat and high levels of CO2 concentration. A smart control unit selects an optimal ventilation and illumination level, and, if necessary, allows for individual adjustment. Once an employee leaves the SILENT ROOM, intense ventilation is automatically activated to prepare the room for the next user.

ACOUSTIC PODS

SILENT ROOM is easily adapted to a variety of activities. The acoustic pods come in four different sizes with selectable options such as glass back-wall inserts, high or standard tables, seating, monitor holders, etc.

For users' convenience, the room can be equipped with a power outlet (USB type A and C connectors) or 3-plug power block. The power block can come with in-built sockets, LAN or USB ports in various configurations.

FREE STANDING

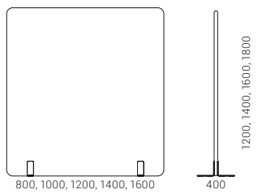

Multifunctional acoustic screens

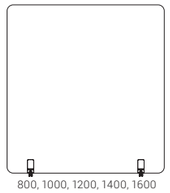

FREE STANDING acoustic screen system offers unlimited possibilities to divide your office with visual and acoustic barriers and even quickly create new areas for specific types of activity.

Thanks to their simple configuration, these acoustic screens allow you to easily divide your office space into desired areas. You can choose free standing screens with support feet or mobile screens on casters. The panels are available in a broad selection of sizes and can also serve as workspace dividers.

The screens are filled with a special sound-absorbing foam and provide a class C sound absorption. They can be upholstered with the fabric of your choice. The special connectors can be used to combine, align and hold the screens in place.

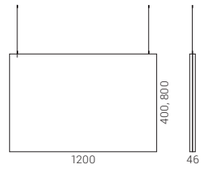

MODUS

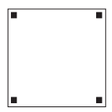

MODUS acoustic panels will improve your working environment and workplace well-being by absorbing background noise and by creating acoustically private spaces as well as bringing character to the interior space. The acoustic panel system includes wall panels, ceiling (horizontal) panels, and ceiling (vertical, double-sided) panels.

The panels come in different sizes, as large as 1200x1200mm, and are very easily joined together. The panels contain a special patented and certified material designed to efficiently absorb sound.

Double-sided (vertical) panels

Wall panels

Ceiling (horizontal)panels

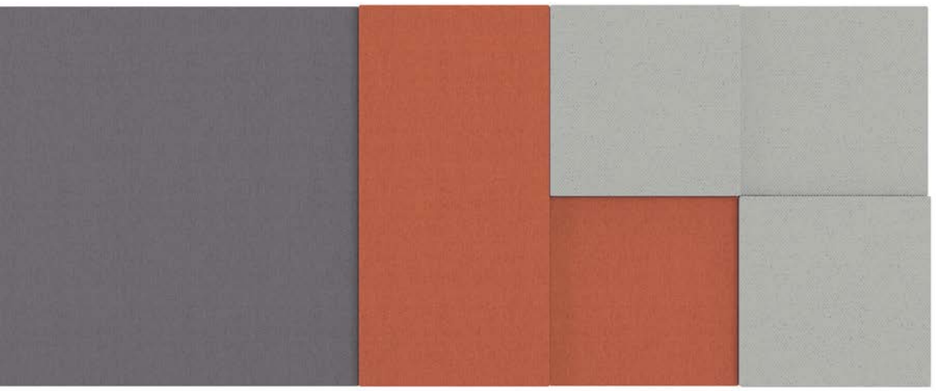

MODUS

You can choose acoustic panels with different fabric colours on each side to create your own unique interior design. Select from from six different sizes and mix and match different panel depths (40 or 70 mm).

ACOUSTIC SCREENS & PANELS

A fusion of acoustics and design

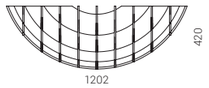

The collection consists of three types of acoustic products for ceilings: PET felt acoustic clouds, PET felt acoustic baffles and PET felt acoustic panels for ceiling. Choose your desired colour and this acoustic product will serve as a unique interior design element for your office.

PET felt acoustic clouds

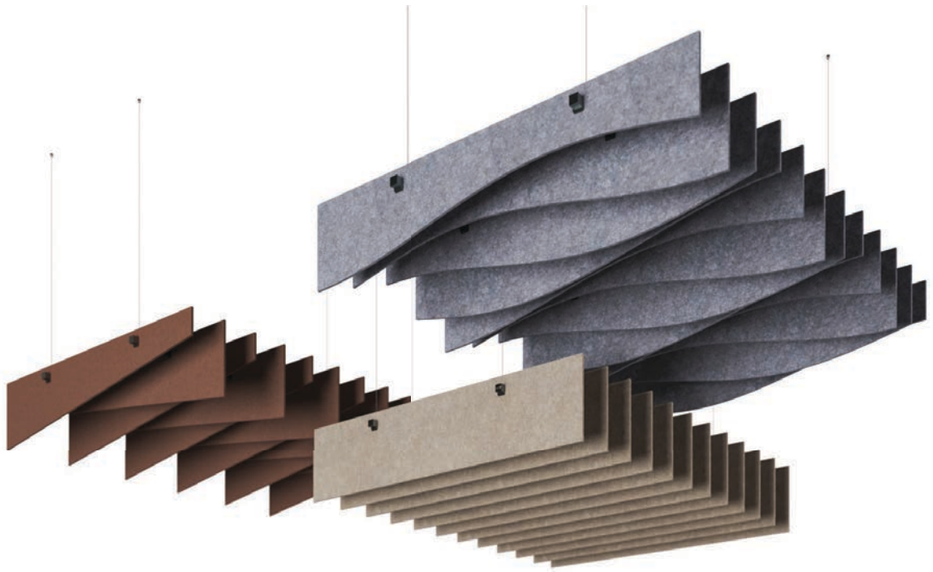

PET felt acoustic clouds are a ceiling solution that improves office acoustics. Just like a shadow, this acoustic cloud is always here to efficiently absorb ambient sounds. With the help of these acoustic elements, you will be able create an acoustically comfortable environment for both work and relaxation.

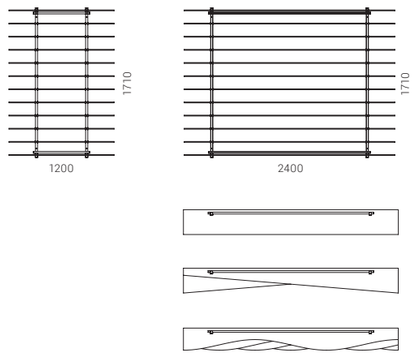

PET felt acoustic baffles

These acoustic segments are formed from PET felt pieces available in three different shapes (Plain, Blade, Wave). It is an effective interior solution for rooms with high acoustic requirements, such as open-plan offices.

ACOUSTIC ARTWORK Ceiling

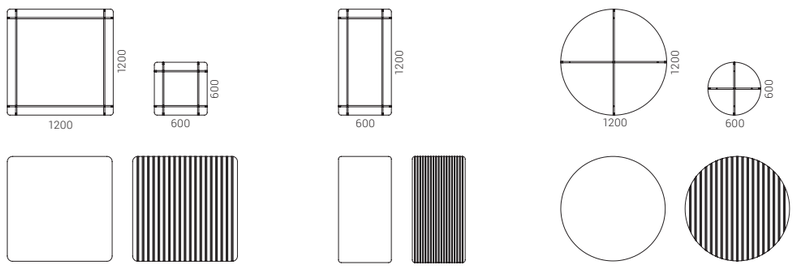

PET felt acoustic panels for ceiling

Available in two different shapes (round and rectangular) and a variety of colours and sizes, the panels not only improve the acoustics of a room but also “adapt” flexibly to the functional and aesthetic requirements of a given space, creating an attractive and modern interior design.

Sustainable design

PET felt acoustic products encourage responsible use of resources and waste reduction, as they are made from recycled materials and are also recyclable. These products feel similar to wool to the touch, but the PET felt is in fact made from plastic and uses more than 50 percent of recycled plastic.

ACOUSTIC ARTWORK Ceiling

PET felt tiles for suspended ceiling “Armstrong”

They are a functional acoustic solution for ceilings with a wide choice of colours and easy installation. Easily match a colour or colour combination to a specific interior design concept.

PARTHOS

ACOUSTIC
FURNITURE

Wide range of functional applications

The PARTHOS collection consists of four types of acoustic columns. By combining them with different NARBUTAS acoustic solutions, you can create acoustic comfort and a stylish environment for your employees.

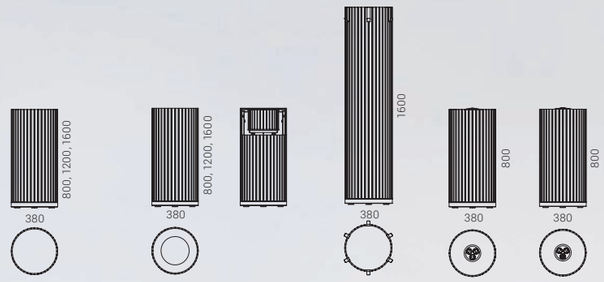

Ensured acoustic features

PARTHOS ensures that high-, medium- and low-frequency sounds are attenuated. It is covered with PET felt, which is porous and enhances these properties. The choice of pattern also contributes to the improvement of acoustics by dispersing some of the sound waves.

Sustainable design

For the filling of the acoustic columns, we used textile offcuts left over from the manufacturing process. The acoustic columns are covered with PET felt made from more than 50% recycled plastic.

MODULAR
SYSTEMS
AND POUFS

Design by Christina Strand and Niels Hvass

A private and quiet space for meetings

JAZZ Silent Box is a quiet place of retreat in your office environment designed for meetings, brainstorming, individual work or relaxation. JAZZ Silent Box is made of special sound-absorbing material which delivers class D sound absorption.

JAZZ Silent Box

Silent Box option with a table and a monitor holder will enable you to work on your computer conveniently and to display visual information on the screen during meetings. The furniture can also be equipped with a power outlet and a USB connection.

JAZZ Silent Box

Choose the acoustic walls of JAZZ Silent Box without the integrated soft furniture or table. Place your own customized combination of furniture within the acoustically pleasant and private environment of JAZZ Silent Box.

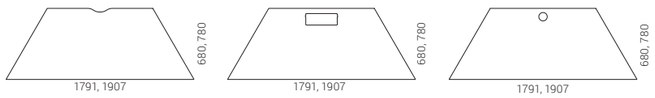

JAZZ Silent Box

MY SPACE

Create your space with MY SPACE

From private mini-rooms for concentration to collaboration areas for teamwork, this system provides a comfortable workplace, allows you to distance yourself from ambient noise, and opens up new “office-within-office” possibilities.

Proven acoustic characteristics

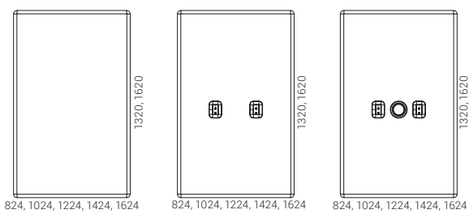

MY SPACE is a great choice to reduce the overall noise level of the office as the acoustic screens are filled with a special sound-absorbing foam and covered with upholstery of your choice.

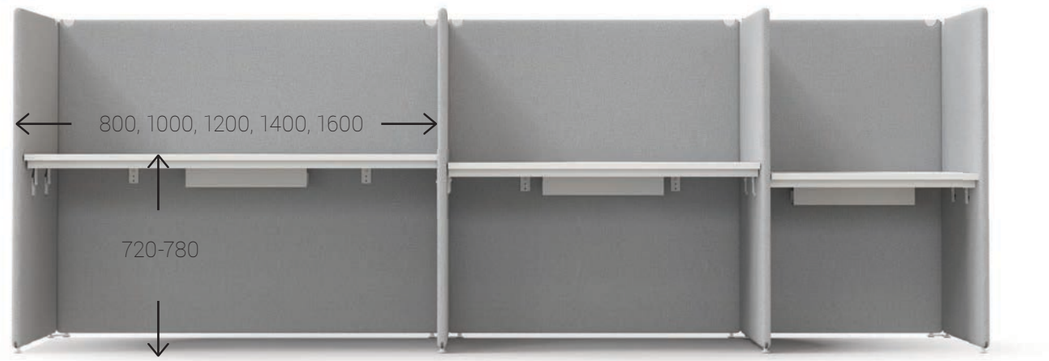

Make your office stand out

Different size and shape desktops make MY SPACE a flexible solution for almost any working environment while height-adjustment function helps create a convenient workplace for individual tasks.

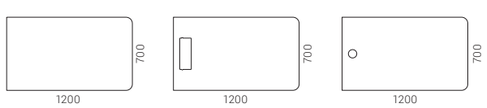

Thanks to the modular construction, this acoustic furniture allows you to electrify up to 6 workplaces with a single power socket. MY SPACE is available with a 3 socket power unit that can be used for standard power supply, USB, or LAN connection in different configurations.

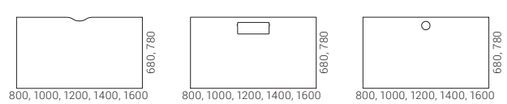

You can choose different interior and exterior colors for MY SPACE screens. Use your desired color combinations to create individual spaces or group workspaces.

SYSTEMS AND
POUFS

Design by Baldanzi & Novelli designers

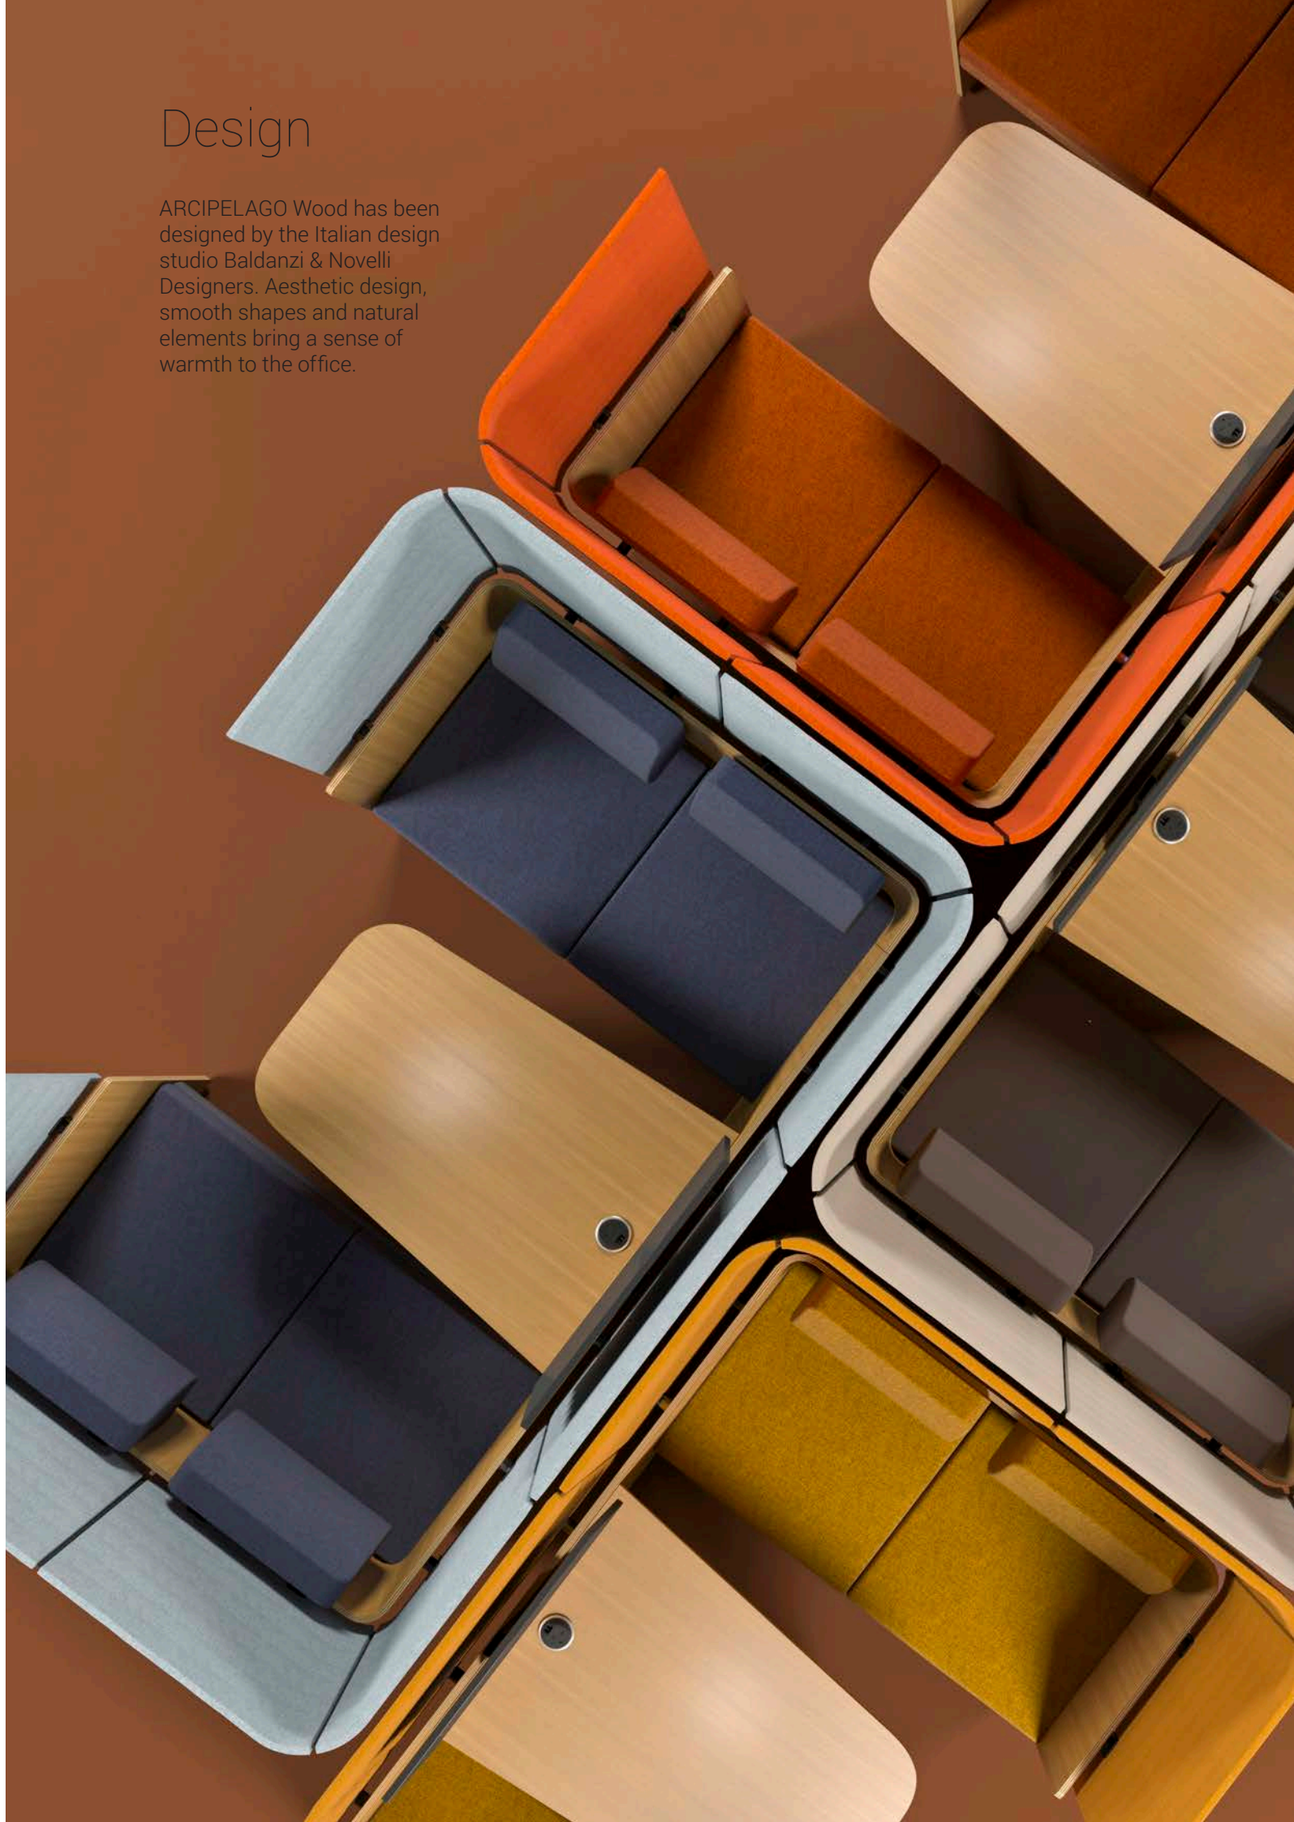

Escape busy office environment

ARCIPELAGO Wood lounge seating is ideal for creating an enclosed “room within a room” in open-plan offices. It serves as a meeting and work space where you can isolate yourself from ambient noise. This lounge seating is ideal for multiple uses: brief tasks or longer work sessions, meetings, teamwork or relaxation.

Design

ARCIPELAGO Wood has been designed by the Italian design studio Baldanzi & Novelli Designers. Aesthetic design, smooth shapes and natural elements bring a sense of warmth to the office.

ACOUSTIC
FURNITURE

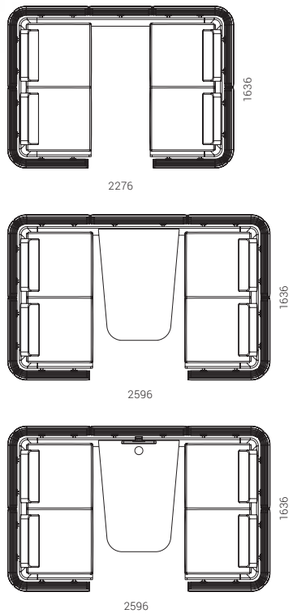

Functionality

The seating unit can accommodate a monitor screen for convenient presentation of information during business meetings. The table is equipped with a power socket with integrated USB type A and C connectors for any work devices to make sure you never run out of energy.

Comfort

Baldanzi & Novelli Designers who created ARCIPELAGO Wood compares this piece of furniture to an island which offers a natural retreat. ARCIPELAGO Wood high panels serve as barriers shielding employees from background noise while comfortable seating creates a laid-back and private environment.

DESIGN AWARD 2024

reddot winner 2024

Seamless minimalist design

The seat merges gracefully with the backrest and is shaped to follow the curves of a sitting body. The elegant curve of the frame begins at the top and flows down to the sides in an ergonomic sinuosity.

We wanted a linear, continuous and simple structure. We were inspired by herons flying lightly above the water and resting on it. We thought of bamboo reeds, so slender and so strong in the wind.

Baldanzi & Novelli designers

Features that ensure a pleasant sitting experience

The backrest, seat and synchro mechanism integrated into the chair work together to form a flexible structure for exceptional user comfort. You can also choose from non-adjustable armrests or 2D and even 4D adjustable ones.

A variety of choices to create the desired image

Choose from three available chair frame colors, and explore six mesh colors carefully selected by the design team to perfectly reflect contemporary office trends. With this choice of plastic and mesh colours, you can create both colourful and monochromatic combinations.

Exceptionally cosy design embracing office spaces

A well-designed and comfortable office chair is among the key elements contributing to a cosy office environment by prioritising the physical well-being and satisfaction of employees. OFY is a wide collection of chairs with an exceptionally cosy design that meets the needs of a modern employee in different office spaces. It consists of executive chairs, traditional and low-back task chairs and visitor chairs with a pyramid-shaped base with glides or castors.

GERMAN DESIGN AWARD WINNER 2025

OFY

OFY stands for 'Only For You'. When designing the chair, we tried to ensure that it could be used by different companies in different architectural spaces and that each employee could have 'their own' chair.

Alegre Design

Armrests with different designs and functionalities

A broad selection of armrests will make it easy to find the right solution for different workspaces. The two types of non-adjustable armrests have a graceful and elegant design. If you want to be able to adjust the armchairs to find the most comfortable position for your arms, you can choose between 1D (moves up/down) and 3D (moves up/down, forwards and backwards, sideways up to 30°) adjustable armrests.

Where comfort reigns

As employees spend more and more time not only in their workplaces, but also in meeting and relaxation areas, modern offices are being designed and furnished with comfort and style. Introducing SANDIE, a collection of elegant furniture, designed to transform modern offices into stylish and comfortable spaces. It consists of high-back executive chairs, medium-back task chairs and low-back meeting chairs.

SANDIE was inspired by the lightness of wind-shaped dunes. It is the result of an extensive process of aesthetic and functional exploration.

Baldanzi & Novelli designers

Innovative synchronous mechanism

The new synchronous mechanism integrated in the task, executive and meeting chairs ensures seating comfort. The backrest can recline up to 18 degrees, while the seat moves up to 6 degrees, allowing the user to lean back without lifting their feet off the ground.

SYNCHRONOUS MECHANISM

LOCKING POSTITIONS

PNEUMATIC HEIGHT REGULATION

A set of elegant lines

There are no straight lines in SANDIE chairs, only soft and sleek curves that blend into an expressive whole. Every detail of the collection has been well thought out to achieve a dynamic yet subtle minimalist design.

CHAIRS

We felt the need to give this product a decisive character – an element defining its identity. Thus, we came up with an idea to create a back support made from a transparent and flexible material and to make it an anthropomorphic shape instead of a technical shape which would be pleasing to the eye and as clear as the wind blowing onto the sails of a ship or making leaves tremble.

Baldanzi & Novelli Designers

WIND family of chairs offers a combination of ergonomic features, functionality and unique design. Task chairs, high swivel chairs and visitor chairs designed for dynamic and efficient work and collaborative use are ideally suited for modern office spaces characterized by a unifying and unique WIND design.

Unique lumbar support

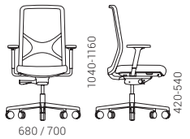

WIND has an instantly recognizable X-shape transparent lumbar support uniquely designed to enhance the chair's visual appeal and serve a very important function. Its height can be adjusted and it conforms to the user's lumbar shape due to the elastic properties of silicone to provide exceptional comfort.

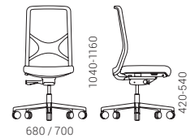

3 types of backrests

The backrest with a flexible mesh easily adapts to the natural shape of the user's spine. The aesthetic breathable mesh material ensures all-day comfort, no matter what seating position you use.

Micro-mesh

The mesh features a unique 3D structure which gives this chair a dynamic and distinctive look. This eye-catching and breathable fabric allows free circulation of air and helps prevent overheating. The soft and lightweight mesh adapts to the user's lumbar shape in order to keep the user comfortable throughout the day.

Runner mesh

The upholstered backrest is shaped with the principles of ergonomic seating in mind to ensure maximum workplace comfort. Its polyurethane insert with uniquely designed horizontal seams on both sides gives a totally different character to the chair. The backrest comes in a variety of upholstery options.

Fabric / leather look

Choose a backrest with a unique knitted mesh created by an Italian design studio Baldanzi & Novelli designers. The mesh design pattern follows the X shape to further enhance the lumbar support that creates the WIND chair's identity. The knitted mesh is made using cutting-edge technology which allows us to manufacture chairs with seamless backrest corners so no scrap material is left behind.

Knitted-mesh

Simple and intuitive adjustments

WIND encourages an ergonomically correct sitting position and provides the functionality you need. Thanks to its simple and intuitive adjustment, the chair can be easily adapted to individual user needs and offers maximum comfort for long stints at the desk.

Graceful style work chair

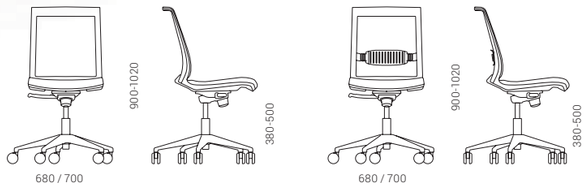

The chair's name EVA is a female name derived from the Hebrew name, meaning "life", may also have the meaning "lively". This is exactly what this task chair is, whose graceful shape is emphasized by the integrity of the backrest and seat.

Easy to feel comfortable

The back of the chair with a light, breathable polyester mesh adapts to the curves of the back and ensures comfortable support and constant air circulation. A stiffer plastic mesh for the back provides more support. The model with height-adjustable lumbar support - even better adapted to the shape of the user's back.

The EVA task chair has a tilting mechanism, it means that the backrest and the seat are connected, and when the backrest is reclined, the whole chair tilts. For the convenience of the user, the backrest can be locked in four different positions.

The seating part and the backrest are soft and give enough space to ensure comfort for a user.

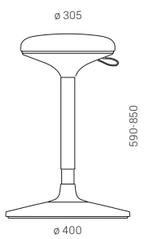

WOBBY

Your best office partner

The WOBBY pivoting stool is a great choice for those looking for healthier sitting alternatives. It is a perfect active sitting solution for dynamic work and cooperation areas. The upper part of the stool swings and moves together with its user, so it can also be used as a support when standing. This allows you to change the position of the body at the workplace throughout the day without distracting from important tasks. Due to its modern and sleek design, this balance chair will fit into any contemporary office space.

A unique pivoting system

The distinctive feature of this chair is its unique pivoting system, hidden inside an elegant black plastic base. With the help of this system, the seat can be tilted up to 8 degrees in all directions and rotated 360 degrees. Having a non-skid surface, the base of the stool will always remain stable, while the high-quality materials will ensure safe and long-lasting use.

Easy to use and safe

A pneumatic lift mechanism lets you fine-tune the perfect level for different work surface heights. The seat height can be adjusted from 600 mm to 850 mm with an elegant brown leather strap. Having a non-skid surface, the base of the stool will always remain stable, while the high-quality materials will ensure safe and long-lasting use.

D-CHAIR

Design by "Baldanzi & Novelli designers"

> 256
TASK CHAIRS

> 328
VISITOR, CONFERENCE & DINING CHAIRS

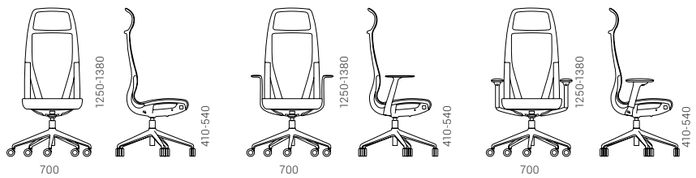

Minimalist design with innovative engineering solutions

All the details of the D-CHAIR chair not only create a modern aesthetic and a sensation of lightness, but also ensure the ultimate seating comfort. The professional product development team has meticulously designed every curve, rounded shapes, joints of the chair and thickness of its components, so that D-CHAIR ensures seating comfort and easy recline for the seated person.

DESIGN AWARD 2024

reddot winner 2024

The soft yet firm movement gives a pleasant sensation of lightness. Lean back and feel how naturally the chair adapts to your body's movements and weight – as if it were a living organism.

Baldanzi & Novelli designers

Headrest for even more comfort

The D-CHAIR executive chair with a high backrest has an integrated headrest. This additional part of the executive chair helps to relieve the neck tension and provides support and comfort for the head and neck when leaning back. The headrest is recommended for people who work in a sitting position for long periods. In addition, you can easily move the chair from one place to another by holding it by its upper frame.

In addition, you can choose a height-adjustable lumbar support with a smooth range of motion of 100 mm. It is made of a flexible PET plastic material that adapts well and gives your back even more support and comfort. This is particularly important when we spend long hours sitting.

Transparent continuous mesh adds lightness to the design

The backrest and seat of the chair are made of a continuous mesh that is transparent. This gives the chair a sense of lightness and emphasises the beauty of its structure.

All the parts of the chair come together to form a unique, indivisible unity

The professional product development team has meticulously designed every curve, rounded shapes, joints of the chair and thickness of its components. The seamless seat monoblock is made up of many different yet interacting parts that come together to form an indivisible unity, creating an innovative design. This is the main feature of D-CHAIR that makes it so unique and guarantees maximum sitting comfort.

Exceptional design and comfort

Executive office shapes the image of the whole company. This space is held to the highest standards of comfort and representativeness, which is why the right choice of furniture is so important. The SANDIE collection has been designed with particular attention to design and comfort, ensuring that each product not only looks sophisticated, but also allows the user to relax and feel comfortable.

Integrated armrests create an image of gravitas

The armrests of the furniture subtly merge with the backrest, seeming to embrace the user from behind. The continuous surfaces in SANDIE's design not only create an image of gravitas, but also emphasise the elegant lines that add luxury to the chairs.

Features for your well-being

An innovative synchronous mechanism allows the seamless backrest and seat with integrated armrests to move in unison. The backrest can recline up to 18 degrees, and the seat up to 6 degrees, enabling the user to recline without lifting their feet off the ground, ensuring an ergonomic sitting position. In an executive office, where long working hours and important meetings demand exceptional comfort, these functionalities help maintain productivity and well-being.

Distinctive character and freedom of expression for your style

These chairs can be adapted based on the desired interior style as you can choose between industrial style metal legs and Scandinavian style wooden legs. The curved shell and ergonomic seating position makes collaboration process even more comfortable.

The TWIST&SIT chair can be used on its own or in large groups that look great in any space either it's a reception, conference hall or a meeting room.

TWIST&SIT

NORTH CAPE

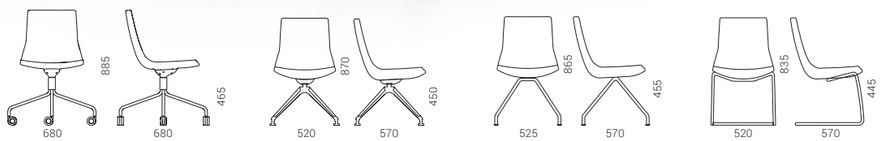

Design by Baldanzi & Novelli designers

> 284 TASK CHAIRS

> 318 EXECUTIVE CHAIRS

NORTH CAPE chairs are refined and stylish, thus can perfectly represent company in meeting and guest areas.

2 sizes for different needs

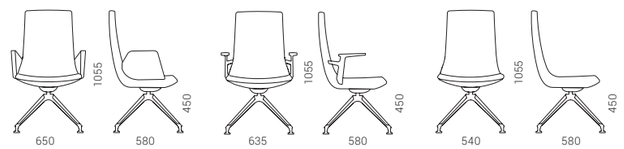

Chairs with lower backrests do not have armrests and are perfect for sitting comfortably in waiting or smaller meetings areas. Conference chairs with the same seating part proportions and armrests like those of task chairs are suitable for more spacious meetings rooms, where longer, more important and likely representative meetings take place.

A choice from 4 bases

There are four options for NORTH CAPE visitor chair base, which suit different needs and office areas. Swivel, 4-leg base in polished aluminium provides elegance and sophistication. Chairs with cantilever base or 4-leg base are convenient for smaller, cosier meeting areas.

The modern rhythm of work

A modern work environment – is more than just a comfortable and ergonomic personal workstation. It encompasses a wide range of different activities which revolve around a practical, functional and stylish chair. POLYTONE collection consists of three types of visitor, conference and dining chairs made of plastic: POLYTONE-C, POLYTONE-L and POLYTONE-O.

Practical and durable material

POLYTONE chairs are made of premium-grade polypropylene plastic. Plastic is one of the most versatile materials which is appreciated not only for its affordable price but also for easy maintenance and durability.

CONNECTORS

Participants in every conference

Because of their simple construction, MOON visitor chairs are very convenient for conference and training rooms. It is easy to arrange them in orderly rows by using connectors.

Bases of three types

There are three different steel bases available for MOON conference chairs: traditional 4-leg, base with castors or elegant sled frame which is made of very thin and elegant lines. The sled base has plastic glides which help to move the chair very easily without any damage to the floor.

Being compact and easily stackable (up to 5 chairs), they save your storage space and are convenient for transportation. Also, for user's convenience, it is possible to add a rotatable writing tablet, which can be fixed to a chair with armrests.

MYAMI

Design by MUCNYC

The MYAMI collection is inspired by the unique blend of elegance and energy found in classic Art Deco design. It is designed to make you feel instantly at home and allows everyone to create their own version of comfort and style.

Stefanie Kubanek and Michael Geldmacher

Home in your office

MYAMI is a soft furniture collection that blends exceptional comfort with a home-like cosiness, creating a pleasant experience in the office—whether for relaxation, informal conversations, or collaboration. It consists of three types of soft furniture: a two-seater sofa, a three-seater sofa and a lounge chair.

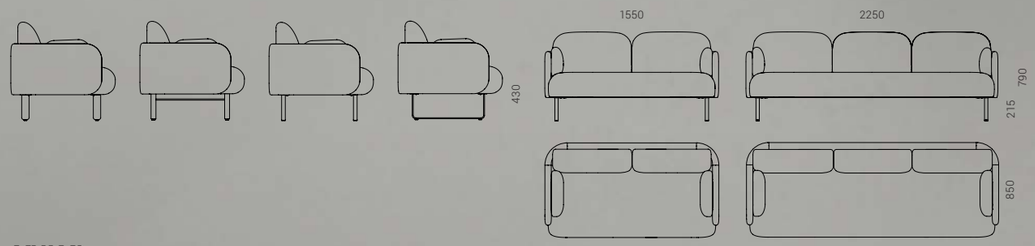

Exceptional comfort

High-quality MYAMI collection furniture is suited for different people. The cushions and seat, made of layers with varying firmness, adapt to the user's body, ensuring even weight distribution and balanced softness. Large, soft backrest cushions and smaller side cushions gently embrace the seated person, providing exceptional comfort for relaxation and rest. The side cushions are also highly convenient for resting the arms.

Timeless, elegant design

The modern architecture characteristic of Miami's South Beach district, which evolved from the Art Deco style, is distinguished by clean geometric lines with decorative accents and rounded or curved edges. This aesthetic served as the inspiration for this soft furniture collection. The MYAMI sofas and lounge chair stand out with a seamless, curved backrest that subtly embraces the seating area.

An ultimate sense of comfort

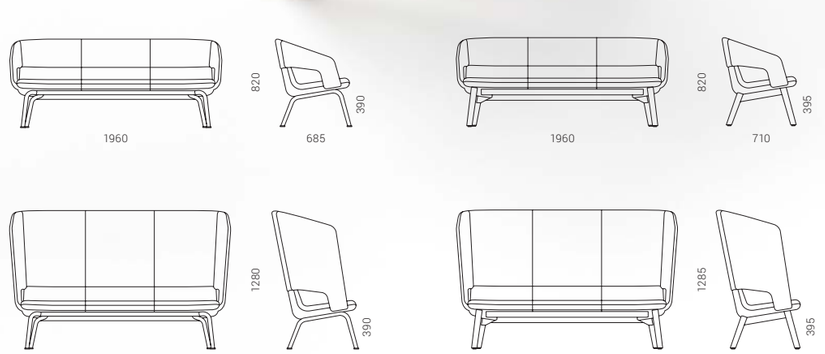

TWIST&SIT Soft seaters ensure a comfortable sitting experience thanks to the increased thickness of the polyurethane padding. The recessed lower part of the backrest subtly conforms to the natural contours of the spine, making the user feel comfortable.

Meets the diverse needs of employees

Low-back armchairs and sofas are ideal for office reception areas or open-plan relaxation spaces, lounge zones or cafés. High-back seaters are a convenient solution for employees who need a private space for themselves where they can escape from the noisy office environment and relax or focus on individual tasks.

SANDIE

Designed by "Baldanzi & Novelli designers"

> 268 TASK CHAIR

> 314 EXECUTIVE CHAIRS

> 336 VISITOR, CONFERENCE & DINING CHAIRS

The SANDIE collection harmoniously combines functionality and aesthetics to provide a pleasant and comfortable sitting experience.

Baldanzi & Novelli designers

For relaxation areas that you will not want to leave

Soft, cosy furniture is increasingly used in the lounge areas of dynamic offices, providing a pleasant place for employees to relax and recuperate during the working day. The SANDIE collection includes two types of lounge chairs, available with high or low backrest options.

Undeniably comfortable low-back lounge chairs

The low-back lounge chairs have an extra cushion that provides an even more pleasant softness, and the wide seat is spacious enough to make you feel comfortable and relaxed when sitting.

High-back lounge chairs for comfort and privacy

The new synchronous mechanism integrated into the high-back lounge chairs allows you to relax and enjoy the comfort. By leaning back, you can adjust the angle of the backrest by up to 16 degrees to achieve the perfect level of comfort for you. The pleasantly enveloping high backrest gives you privacy and isolates you from surrounding noise, while the softness of the lounge chairs allows you to completely immerse yourself in a comfortable moment of relaxation.

ARQUS

EXECUTIVE
FURNITURE

Modern luxury design

ARQUS executive furniture has a modern aesthetic that appeals for its simplicity and elegance. The sturdy structure of the metal table legs is a distinctive design element that adds a sense of lightness, longevity, and durability to the piece of furniture.

The sleek, subtly rounded shapes and lines of ARQUS are reflected in every part of the furniture – in the shape of the legs, the chamfers of the tabletop or cabinets. All the details come together to create a flawless design.

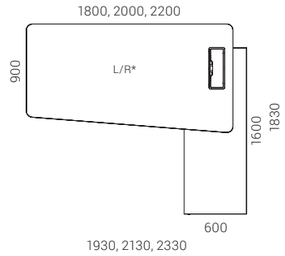

Convenient storage solutions

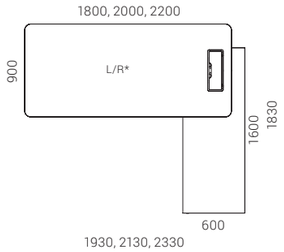

A fixed pedestal to the left or right of the desk allows you to free up desk space for work. In addition, you can store your valuables in a lockable drawer.

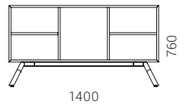

A wardrobe is spacious enough to comfortably accommodate the outerwear of the manager as well as that of meeting participants.

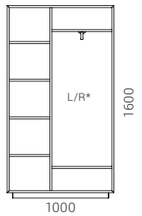

A free-standing cabinet with two doors provides an additional storage space.

* - left/right

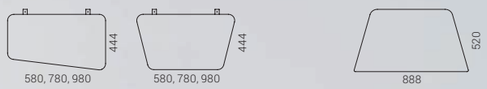

ARQUS

Accessories to complete the collection

You can use a modesty panel to enhance your privacy and create a sense of personal space. A leather table mat provides a smooth and comfortable writing surface and enhances the tactile experience when writing or using a computer mouse.

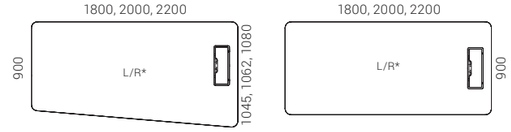

Desktops in two shapes

Large desktops are designed for convenient storage of personal items and work tools within easy reach. You can also choose a desk with a regular rectangular desktop or an asymmetrical option with a desktop tapering to the left or right.

* - left/right

Well-thought-out power solutions

Thoughtful power solutions will allow you to have a comfortable place to work or hold meetings. Executive desks have built-in power socket blocks.

Modern luxury with character

The ARQUS collection consists of desks, meeting tables, wardrobes and cabinets. By using different pieces of furniture united by design elements, you can create a stylistically unified and harmonious executive work environment.

MOVE&LEAD

Design by Gediminas Juška

Move! is a slogan of the modern man that represents the victory of mobility against stagnation, sloth and succumbing to negativity. A true modern leader is driven and open to innovation, a cosmopolitan dictating healthy lifestyle and a teacher who shapes his or her environment with dignity.

Gediminas Juška

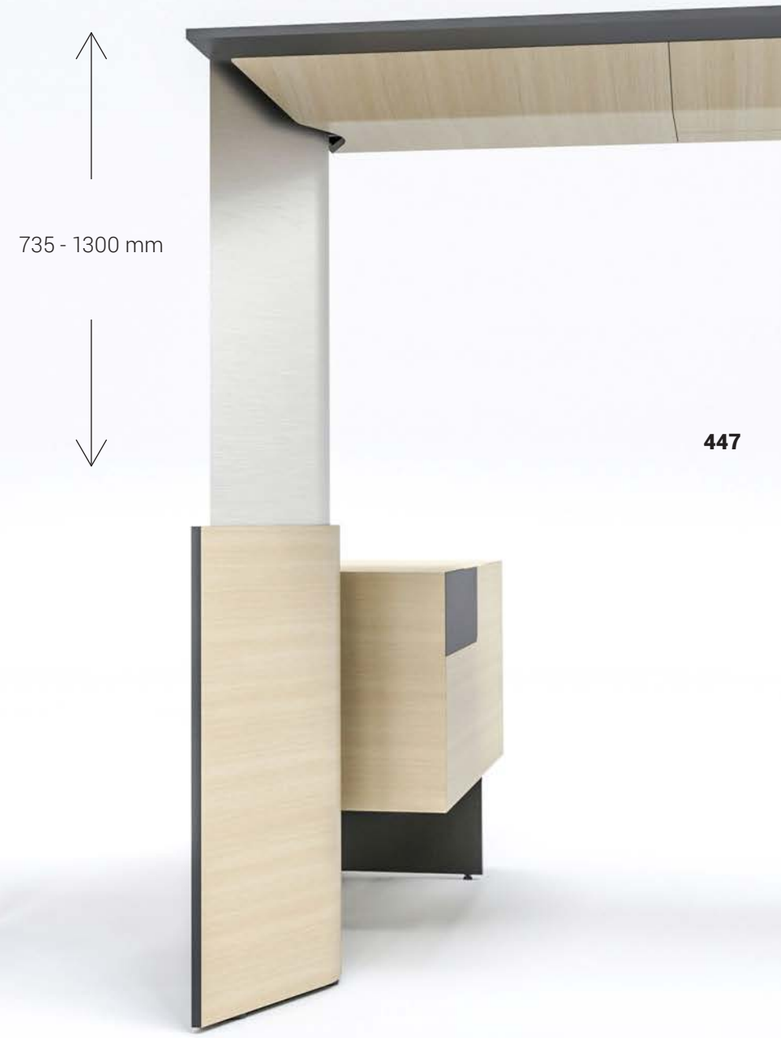

Every detail matters

MOVE&LEAD is a top-quality product which stands out for its uncompromising standards of excellence in craftsmanship. Curved wooden surfaces are shaped employing traditional manufacturing methods and following highest quality standards. Parts of different materials are joined together with every detail in mind.

EXECUTIVE
FURNITURE

Your best move!

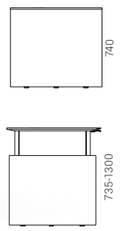

It combines the best in ergonomics and cutting-edge technology and is designed for modern active leaders. The desk's height can be adjusted between 740 mm and 1300 mm, this allows you to stay on the move and be active even at your desk.

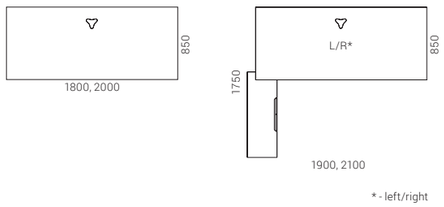

Minimalism is the new luxury

Clean, elegant lines, smooth transitions and subtle combinations of materials are guaranteed to make a strong visual impact in any office. HPL Fenix finish, natural oak, ash or walnut veneer and polished stainless steel surfaces form a harmonious whole and create a sense of subtle luxury.

MOVE&LEAD

Declutter your workplace

The hidden wires can be accessed by opening an elegant minimalist lid. Wires and cables are routed through a subtle triangular-shaped hole with an original cover in a colour that matches that of the desktop or natural wood. MOVE&LEAD desk also has an in-built best-in-class Qi wireless charger (15W) for your smart devices.

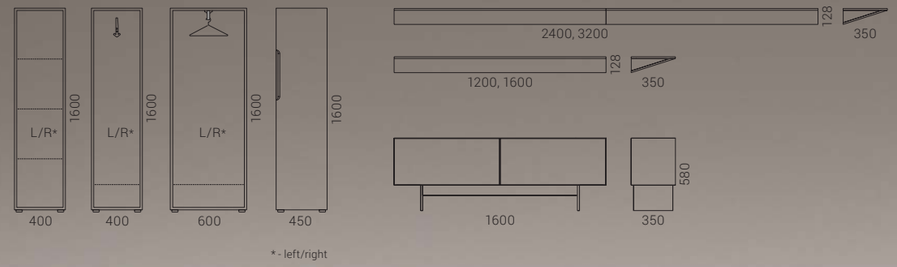

Everything you need

Besides fixed-height or height-adjustable desks, MOVE&LEAD executive furniture system also includes storage solutions to keep your office essentials and personal belongings close at hand. The desk cabinet drawers with special inserts will ensure a well-organised workspace.

MOTION
Executive

> 36
SIT-STAND
DESKS

Modern desk for an active leader

MOTION Executive is a system of electric height adjustable desks, designed for a workplace of a dynamic leader. This desk is a combination of modern elegance and thoughtful functionality.

Modern sophistication

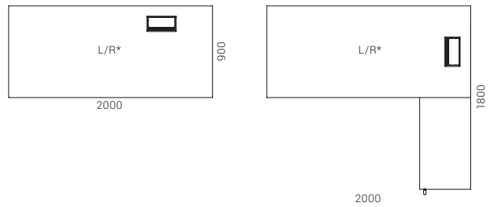

Panel legs hide the space under the desk giving more visual privacy. The feeling of elegance and sophistication is strengthened by the huge size of the top, which is designed for comfortable work. MOTION Executive can have even 36 colour combinations and allows you to create a desk which will suit your interior and personality best.

Easy to use

You can adjust the height of the desk by simply pressing the button or with a remote control application on your smart device. You can save the most comfortable positions and get a reminder to change your body position: to stand up or sit down.

* - left/right

Reveal your style and individuality

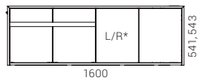

According to your needs, you can choose from two MOTION Executive models: Executive desk made of veneer is designed for those who appreciate naturalness. The top has a subtly chamfered edge, while side panel wraps the desk and makes it look more united and modern. MOTION Executive desk with melamine finish does not have a side panel and looks more simple and modest.

Obstacle avoidance system

MOTION Executive desk is integrated with a sensitive gyroscope-based anti-collision unit that senses both hard and soft obstacles.

* - left/right

Functional storing

The range consists of several pedestals of different sizes and drawers with or without metal file bars. An easily reachable drawer can be situated in the upper corner of the desk, it is convenient for storing your valuables and can be locked for safety.

The strict lines of the ICE reception unit create an impeccable shape, suitable for both fancy and ascetic office interiors.

Subtle combinations

Depending on your vision for the interior, choose between a cozy melamine, or a luxurious veneer finish. Various front and top combinations are also available. Using the same finish on the top, base and front will create a solid and minimalistic reception unit, which will be as clean and smooth as ice. On the other hand, introducing a different-coloured top or decorative inserts will allow you to subtly reveal the elegance of this reception unit.

ICE

Ergonomic workspace

The ICE reception unit conforms to the needs of an ergonomic workspace and fits either one or two workstations – a perfect match for NARBUTAS sit-stand or fixed-height desks.

DOMINO

The rules are simple: never stop creating!

DOMINO is a unique piece of furniture that will enable you to create a one of a kind design for your reception in just 4 simple steps. There are no two identical rounds in the game of dominoes, just like there are no two identical DOMINO pieces of furniture!

Easy way to create unique reception furniture

Firstly, choose the furniture base that suits you best from a range of nine different options. Secondly, combine two thicknesses of exterior panels (18 and 31 mm). Thirdly, choose panels in multiple colours and combine different coatings: upholstery, melamine and natural veneer. Lastly, create your own custom pattern using panels available in 200, 400, 600 and 800 mm sizes.

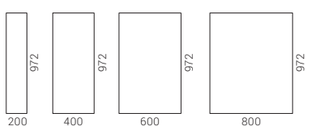

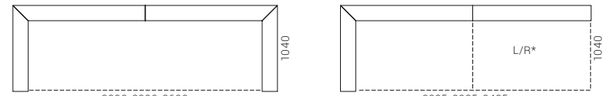

Cosy atmosphere and acoustic comfort

For your DOMINO setup, we recommend using MODUS acoustic screens which will allow you to maintain consistency in your interior style and provide employees with a sense of privacy.

* - left/right

Ergonomic workplace

You can create an ergonomic workplace using both regular or sit-stand desks which can be adjusted to a chosen height by employees.

Cable management solutions

DOMINO reception furniture has all the cable management solutions that are necessary for an ergonomic workplace. Electrical and internet cables will not get in your way and your desk area will be clutter-free and aesthetically pleasing to the eye.

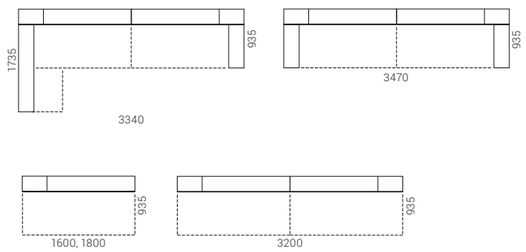

DOMINO

NOVA

Varying forms

Our reception furniture sections are available in different forms. Choose a combination best suited for your office layout.

RECEPTION
FURNITURE

Plexiglas décor

NOVA reception furniture features nice Plexiglas inserts which add a playful touch to these pieces of furniture.

COSY

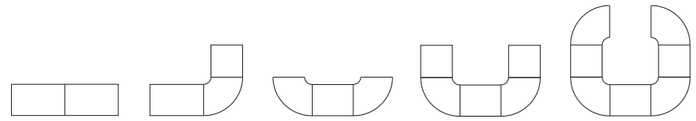

A clean, modern look with no sharp corners on the front side will create a friendly and cosy atmosphere for your visitors. A compact-looking reception is equipped with a 2000mm long table which provides plenty of working space and has many niches for storage. This product also features high-quality impact-resistant materials for better durability.

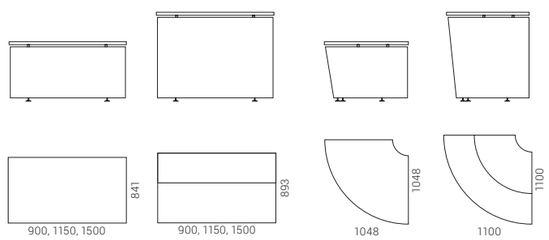

TERA

This modular reception furniture system offers modules in different forms and sizes and is ideal for reception areas of various offices.

CUSTOM-MADE SOLUTIONS

More room for creativity

Your vision, our solutions. Discover our wide range or go beyond standard. Our technological capacity allows us to produce most of our products with small twists or offer you fully-custom solutions tailored uniquely to your needs.

Customised production can be of two types: modifications to standard products according to specific client needs, or unique design products created and developed to meet clients' vision. A professional team of custom-product engineers and designers work each day on numerous designs, ensuring that the clients' ideas are fulfilled down to the smallest detail, while paying special attention to the functionality of the furniture and ergonomics.

NARBUTAS has a wide range of production facilities for large-scale production, as well as for small batches of furniture or one-off products. This makes it possible to work with many different materials and produce furniture with curved shapes and metal parts of varying complexity, soft furnishings, and acoustic products. The plant's modern equipment is versatile, so the range of possibilities is extensive.

CUSTOM-MADE SOLUTIONS

DESKS AND TABLES

Customisations of standard products

The changes you can make to the product:

- Size;
- The location and shape of the cut-out in the desktop;
- The desktop finish and colour;
- The colour of the desk legs.

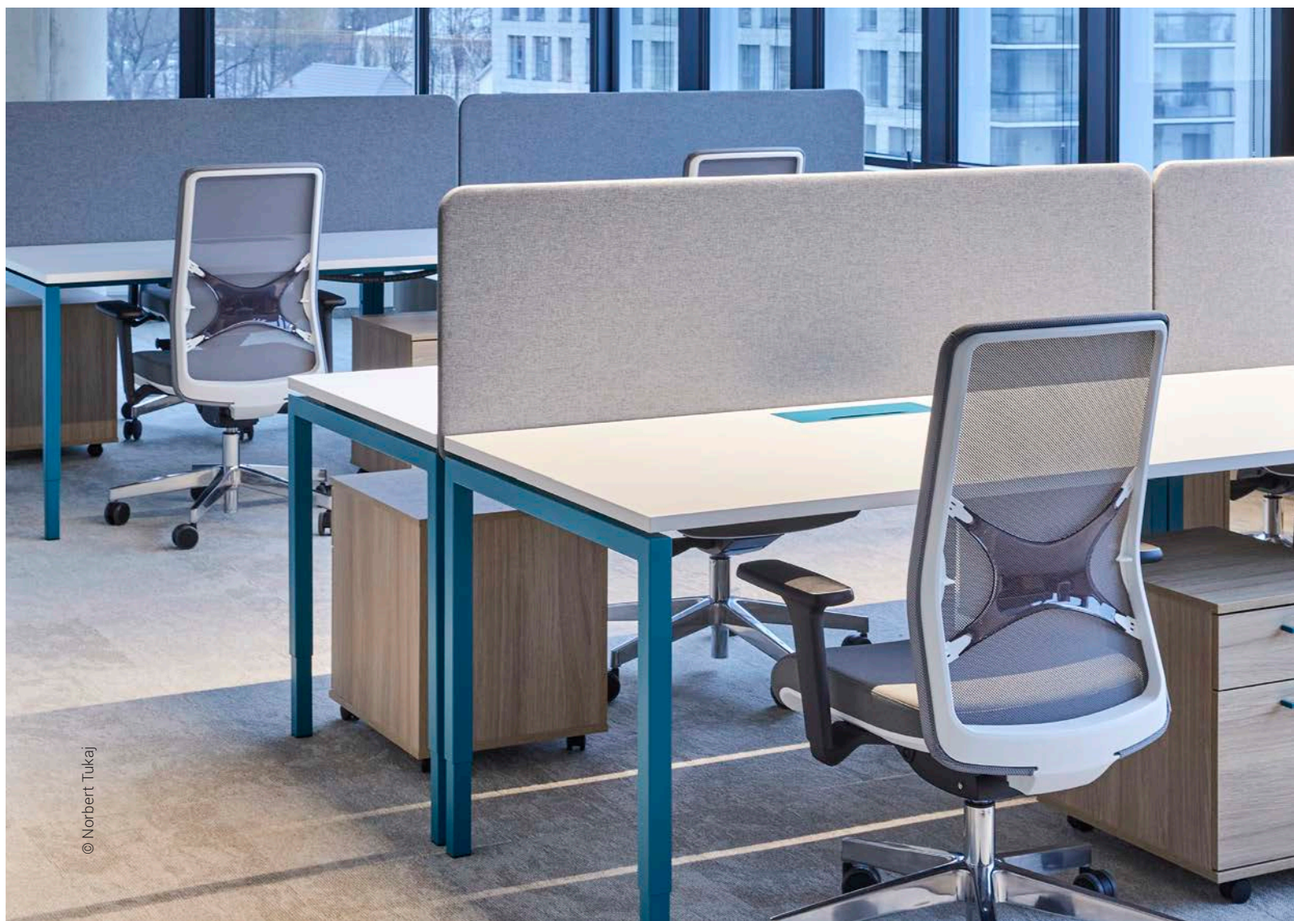

Unique design products

Our technical capabilities allow us to produce exclusive desks, meeting tables or high/bar tables. We can design furniture with different shapes and finishes that are not available in our standard product range.

CUSTOM-MADE SOLUTIONS

STORAGE

Customisations of standard products

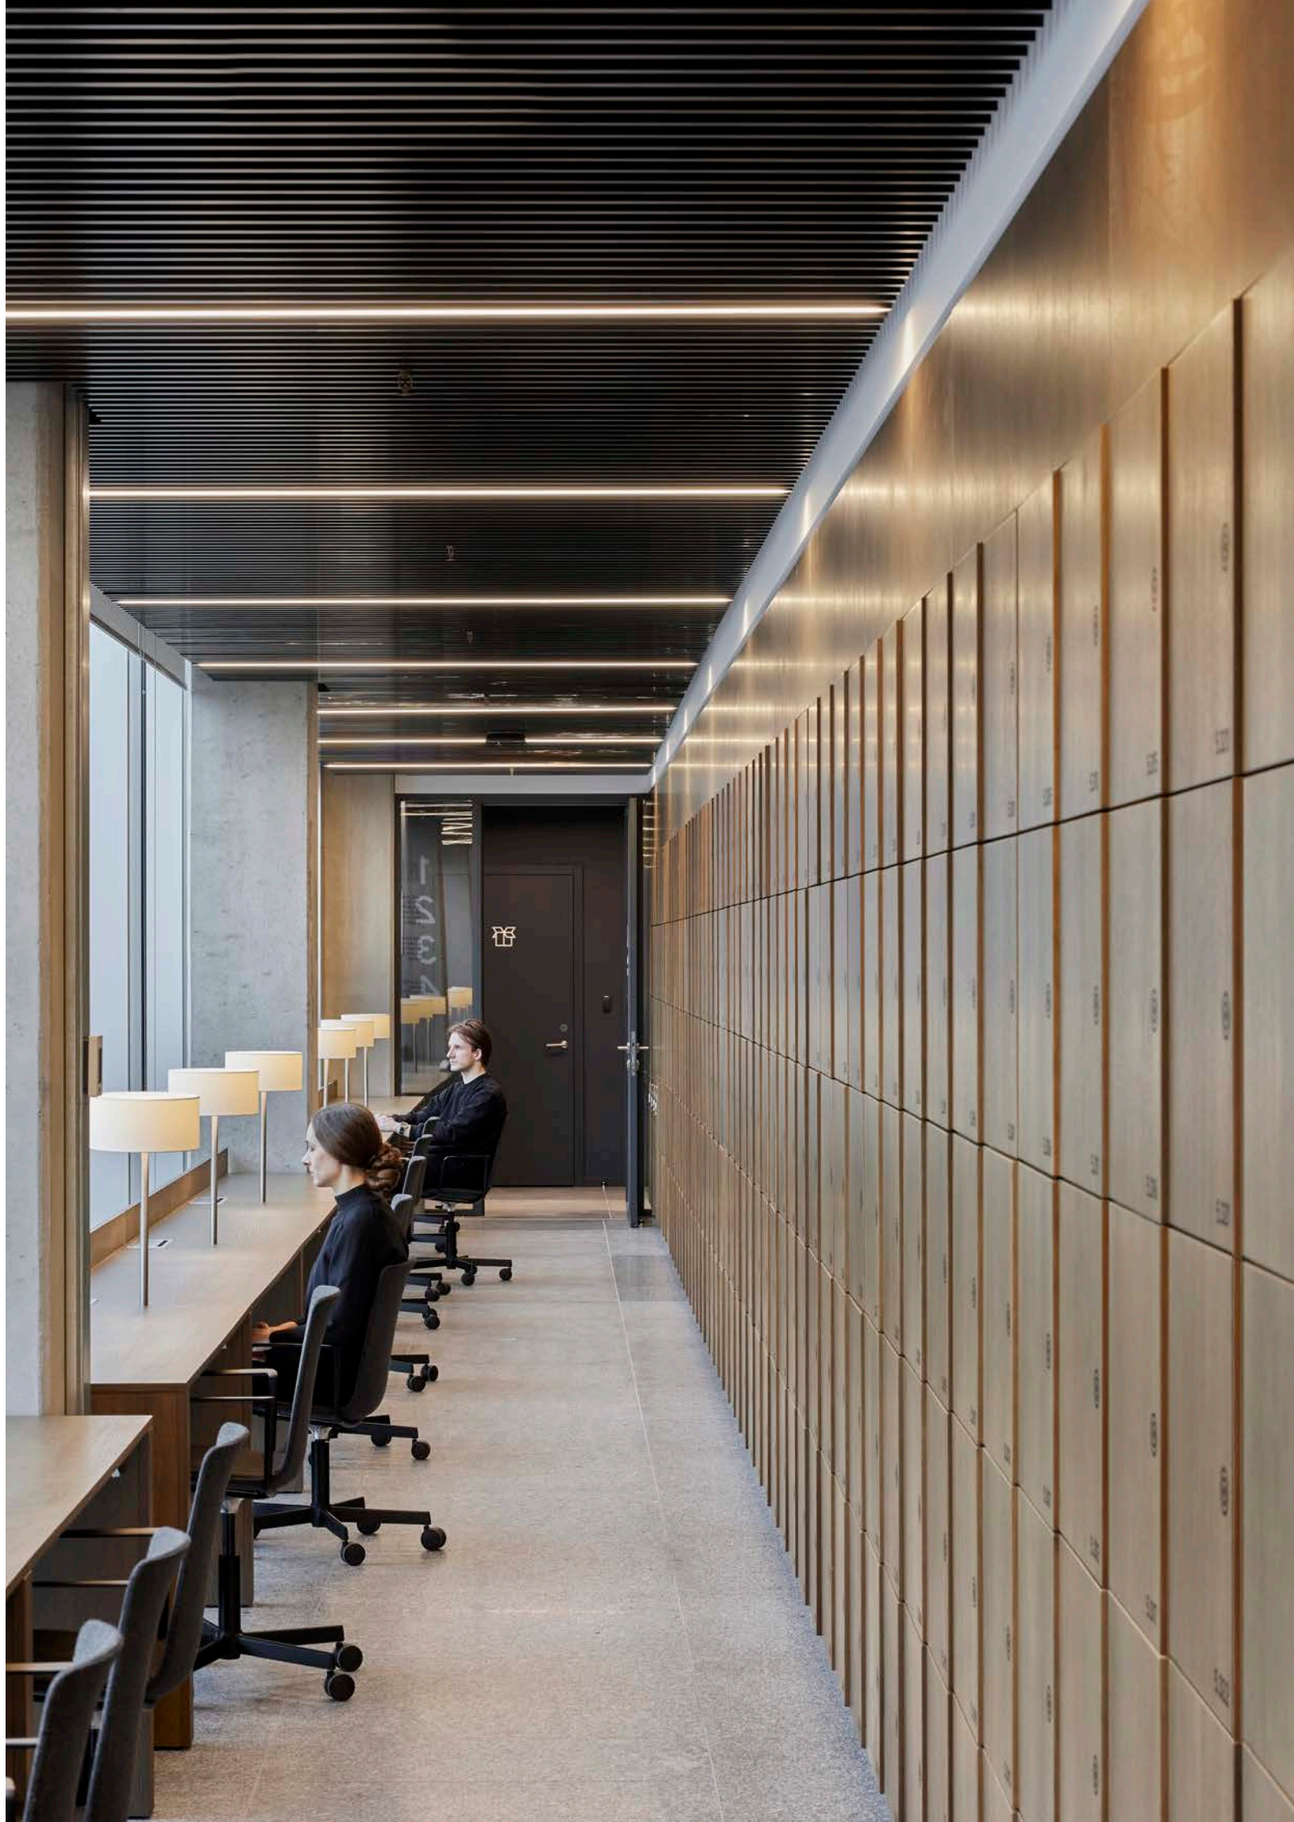

The changes you can make to the product:

- Size;
- Type and colour of handles;
- Storage unit finish or colour;
- The form of delivery, i.e. you can order an assembled storage unit.

Unique design products

Storage units often take up a significant amount of space in an office, so it is essential that the furniture is both practical and stylish. Recessed storage solutions with integrated lighting and acoustic panels will create a cosy environment. And recesses with integrated coffee, tea or even ice-cream machines are sure to become a centre of attraction in the modern office.

CUSTOM-MADE SOLUTIONS

ACOUSTIC SOLUTIONS

Customisations of standard products

The changes you can make to the product:

- Size;
- Shape;
- Colour;
- Pattern.

Unique design products

Taking into account the current trends in office design, we offer a range of acoustic products that are easily adaptable to different offices. The experience we have gained in the development of projects of various complexity evolves into exclusive solutions.

By listening to our customers' expectations, we have developed acoustic pods that have become unique semi-private spaces for individual work or meetings. We can also produce large enclosed acoustic rooms with an additional ancillary space.

CUSTOM-MADE SOLUTIONS

SEATING

Customisations of standard products

Create different looks with NARBUTAS seating. Choose from a wide range of upholstery, artificial and genuine leather collections and shades. We understand that sometimes exclusive interiors require unconventional solutions or shades. That is why we make it possible to choose custom-made upholstery materials.

CUSTOM-MADE SOLUTIONS

RECEPTION FURNITURE

Customisations of standard products

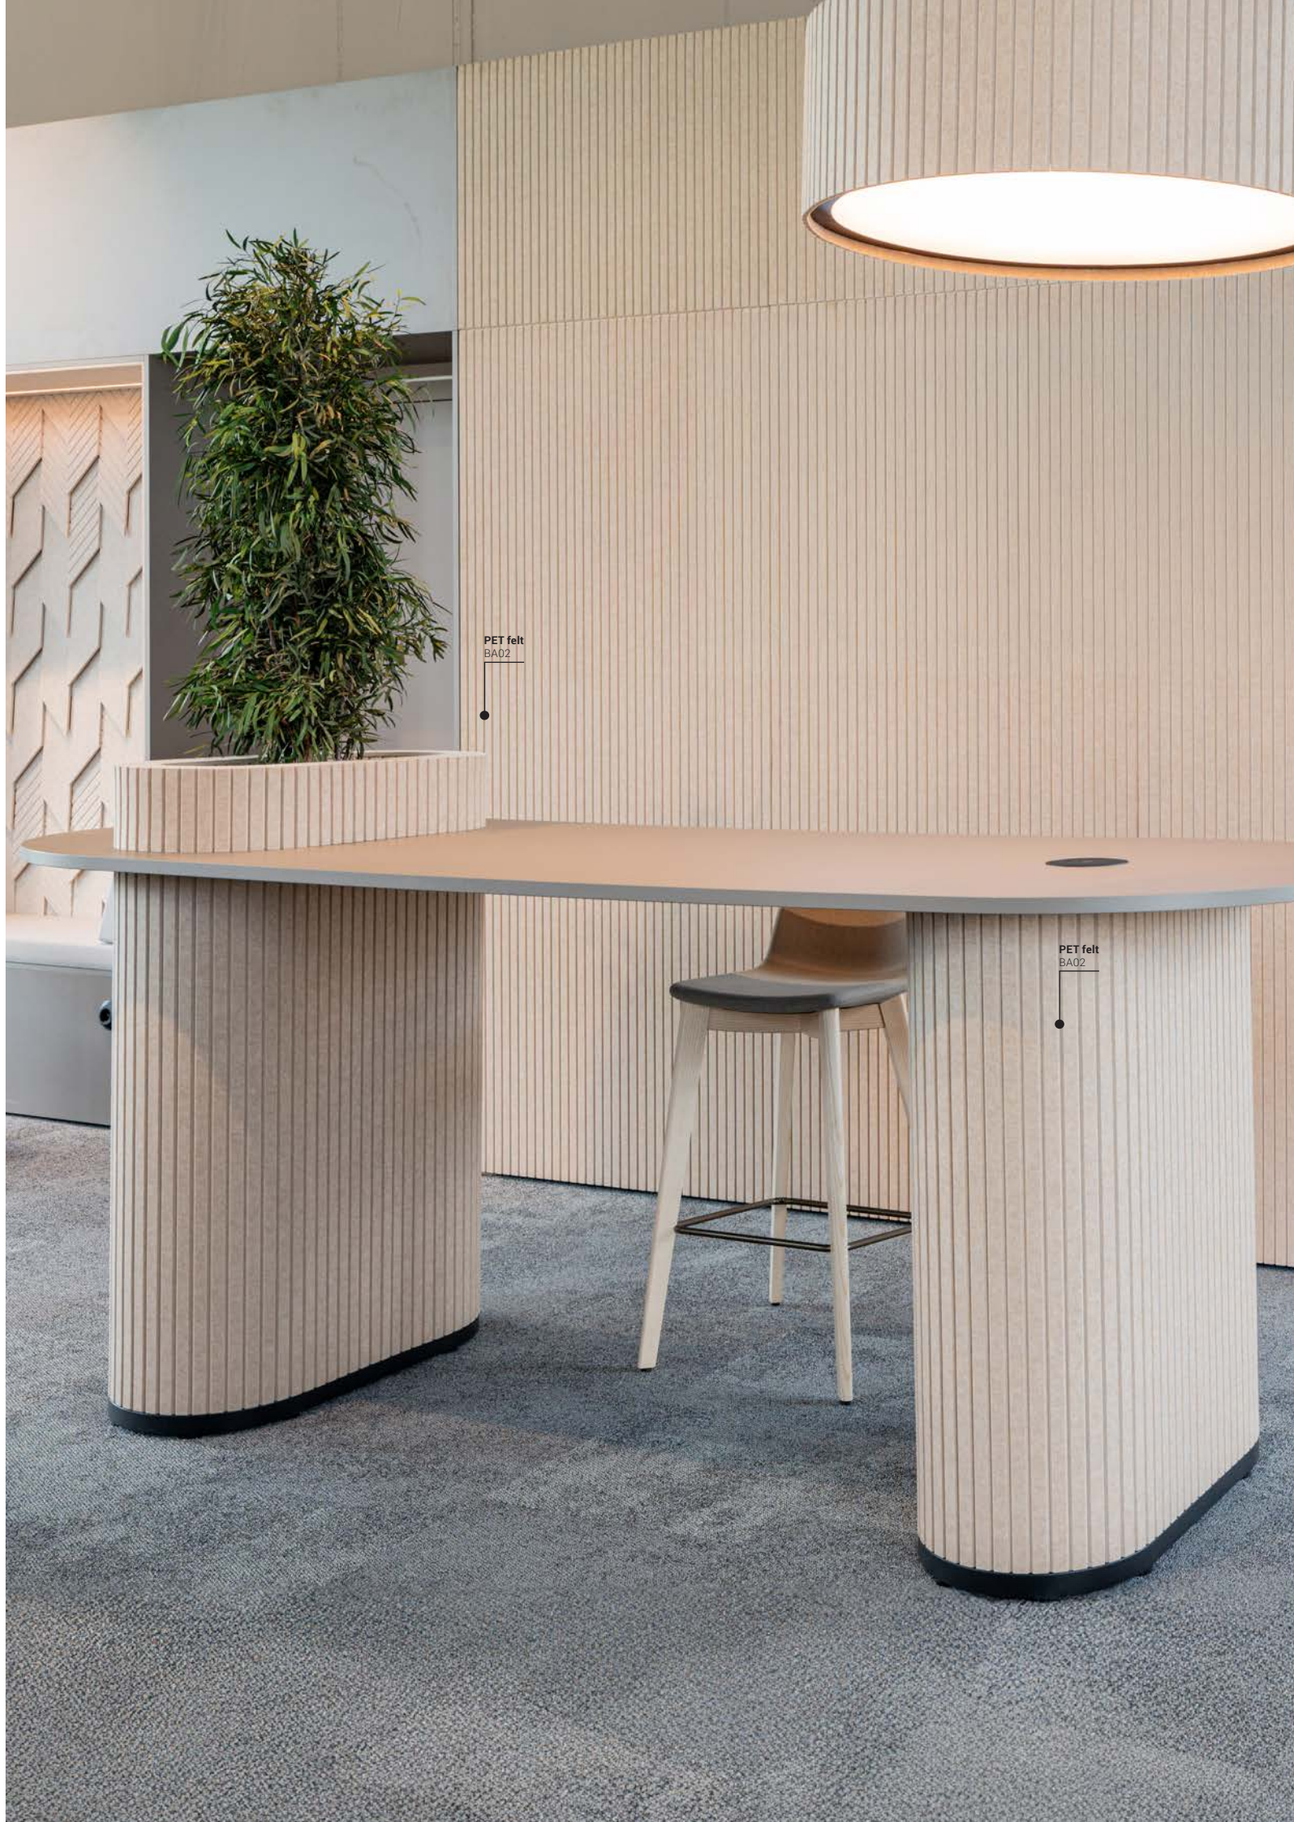

The changes you can make to the product:

- Size;
- Shape;
- Colour;
- Finish.

Unique design products

Customer reception areas usually require customised solutions that can convey the unique image of the company's brand. Thanks to our modern production facility capacities, we can manufacture customised reception furniture with high pressure laminate (HPL), perforated metal or even PET felt finish.

Definition of icons

TILT MECHANISM

The backrest and seat base are linked.
When user leans back the whole chair tilts.

KNEE TILT MECHANISM

The backrest and seat base are linked.
When user lean back the whole chair tilts.
This mechanism allows user to tilt back while the feet remain on the floor, no pressure on the back of the shin.

SYNCHRONOUS MECHANISM

The seat tilting angle is smaller than the tilting angle of the backrest, so that the chair would be more comfortable. This mechanism allows user to tilt back while the feet remains on the floor, no pressure on the back of the leg.

WEIGHT-SENSITIVE MECHANISM

Mechanism automatically adapts to the user's weight and movement when leaning back.

TENSION ADJUSTMENT

This adjustment allows user to control the rate and ease with which the chair reclines for different weights and strengths.

LOCKING POSITIONS

The backrest of the chair has multiple locking positions with different angles for comfortable working, reading or resting.

BACKREST TRAVEL LIMITATION

The backrest travel is limited to 3 positions with back locking in the upright work position.

BACKREST HEIGHT ADJUSTMENT

The backrest height can be individually adjusted according to the height of the user.

SLIDE SEAT

This adjustment helps the user to regulate the distance between the backrest and front edge of then seat, thus providing optimum support for the upper thighs. Correctly adjusted seat depth helps user to maintain proper back support, while distributing the weight evenly across the seat cushion.

PNEUMATIC HEIGHT REGULATION

This adjustment allows the user to change the height of the seat. Pneumatic mechanism uses pressurized air to lift or lower the seat.

HEIGHT ADJUSTABLE FOOTRING

The footring of the chair can be adjusted in height for the comfortable position of user's feet and legs without depending on the chair height position.
It helps to maintain a correct seating position and avoid unpleasant back and neck pain.

ADJUSTABLE LUMBAR SUPPORT

The lumbar support can be adjusted in height and depth (depending on the chosen chair type). Adjustable lumbar support can be adapted to user's individual curve of the spine. It helps to reduce the muscle strain and protect from the back pain.

LUMBAR SUPPORT

The lumbar support is mounted into the backrest and helps to reduce the muscle strain.

HEADREST

This additional part of the task chair helps to reduce tension in your neck muscles, provides support and comfort to the head and neck while in a reclined position.

ADJUSTABLE ARMRESTS

Depending on the chair type armrests are adjustable in two, three or four directions (2D, 3D, 4D): height, width, the pad moves forwards and backwards or is rotatable. Height adjustment takes the strain off the neck muscles. Width adjustment and rotation allows the user to position the armrest in proper distance from the body and helps finding the most comfortable support angle.

WRITING TABLET

Rotatable. It allows users to put their notebooks, laptops or tablets upon.

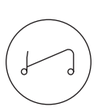

STACKABLE

Chairs can be easily stacked one onto another. Therefore, they are perfect for offices with low storage space.

CONNECTORS

Allow linking chairs in orderly rows.

TROLLEY

By using the trolley, you can easily store or move stackable chairs from one place to another.
