

# ARA FLOOR

*Ilaria Marelli*

Family of floor and wall lamps, with fluorescent, LED and halogen sources depending on the version.

It is composed by two elements in extruded aluminium: depending on versions, structure is painted in white, anthracite, champagne and moka, while the rotating illuminated structure can be glossy anodized or painted matt white or anthracite.

The LED or halogen uplight source is integrated in the upper part of the structure and it creates a widespread light, while a fluorescent or LED source is integrated in the main structure for a widespread and adjustable light.

The power supply is integrated for both versions while the dimmer is on the cable in the LED + LED version and integrated in the DTW version.
